RE: Approval of Incorporating AOC #25 into Facility-Wide Risk Assessment and RFI

Dear Mr. Dauner:

The Department of Environmental Quality (DEQ) has reviewed Calumet Montana Refining, LLC's (Calumet) letter dated July 30, 2021. Calumet requested further human health risk assessment activities at Area of Concern (AOC) #25 be conducted as part of the future facility-wide RCRA Facility Investigation (RFI).

The request was made because of pending redevelopment of AOC #25 Old Pond Area. Calumet intends to construct the pretreatment unit of the renewable diesel unit in this area of the refinery. The July 30, 2021 letter states AOC #25 will be covered with up to 8 feet of soil, any currently staged soil or any generated soil will be characterized and properly disposed, and future activities will follow the Soil Management Plan.

DEQ agrees to Calumet's request.

If you have any questions regarding this letter, please contact me.

Sincerely,

Denise A. Kirkpatrick
