Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☑ Yes	☐ No	☐ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☑ Yes	☐ No	☐ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is ***no***) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

MEMO

Date: **July 19, 2019**

To: **File**

From: **Rob Huening, Ramboll**

cc: **Daniel J Price, Ramboll**

Subject: **Calumet Montana Refining**
Data Usability Assessment
Methods 8260C, 8270, 6020A, MT EPH/VPH
SDG UF15015, 4 Soil Samples, 1 Water Sample

Data validation and usability assessment was conducted for data package UF15015 based on the National Functional Guidelines for Superfund Organic Methods Data Review OSWER 9355.0-132, EPA-540-R-014-002 (USEPA August 2014) and National Functional Guidelines for Superfund Inorganic Methods Data Review (USEPA August 2014). The following samples were reported in this data package:

Sample ID	Lab Sample ID
CMR-EB15-0.5-1.0-190614	UF15015-001
CMR-EB15-15.0-16.0-190614	UF15015-002
CMR-EB15-18.0-19.0-190614	UF15015-003
CMR-EB15-20.5-21.5-190614	UF15015-004
TB-12-20190614	UF15015-005

Data validation included a review of the following QC parameters:

- Data Package Completeness
- Preservation and Holding Times
- Instrument Performance Check
- Blanks
- Deuterated Monitoring Compound or Surrogate Spikes
- Matrix Spike/Matrix Spike Duplicate
- Field Duplicate Samples
- Laboratory Control Sample
- Internal Standards
- Tentatively Identified Compounds
- System Performance
- Overall Assessment of Data

QC criteria were met for each parameter with the following exceptions:

MS/MSD Recoveries
For the metals and VOCs analysis suites MS/MSD results were reported. Recoveries were largely within criteria with the exception of antimony, naphthalene, acetone, cyclohexane, and isopropylbenzene. These out of criteria recoveries indicate a possible bias to results. Therefore, all antimony, naphthalene, acetone, cyclohexane, and isopropylbenzene results were flagged as estimated (J, UJ).

For the SVOC analysis suite MS/MSD results were reported to be almost universally out of criteria with extremely low recoveries. However, this is largely due to non-detected analytes. The MS/MSD sample was spike at a normal level but due to high native concentrations/ matrix issues, the sample was run at a high dilution. Therefore the spiked amount was at or below the reporting limit. Due to this, the low recoveries do not represent a systematic matrix issue. No validation action warranted.

Surrogates/Internal Standards
Surrogates and/or internal standards were out of criteria for several samples analyzes. Surrogates out of criteria can indicate a possible accuracy bias. However, according to the lab narrative the recovery issues were likely due to sample dilutions or matrix effects. Therefore no results have been validated.

Blank Detections
During analysis, antimony, beryllium, and chromium was detected in method blank samples. This indicates a possible cross-contamination issue. Due to this, all low level detections should be evaluated for possible contamination bias. All antimony, beryllium, and chromium results below the RL or below 5x the blank result have been validated as non-detect (U).

Hold Time
All samples were analyzed by the lab within their hold time requirements. However, due to QC issues during the initial analysis some samples were reanalyzed outside of hold time. While these out of hold time results are generally usable, the results within hold time should be used preferentially.

Overall Assessment of Data
Overall, data are acceptable and usable for project objectives. The laboratory flags (*, F1) to denote out of criteria results were removed. Several results were flagged J by the laboratory because the concentrations calculated were below the method reporting limit and above the laboratory detection limit. The J flag was retained. These results should be considered estimated as the calculated concentrations are below the instrument calibration range.

No additional validation actions were taken on project samples. Results are usable for project purposes as validated.

Inorganic Data Review Summary

SDG No. UF15015

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 4 Soil, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	Metals (Modified Skinner List)
Preservation and Holding Times	No issues
Blanks	Antimony, beryllium, and chromium detected in method blank sample. All antimony, beryllium, and chromium project sample results less than the RL or 5x the blank result validated as non-detect (U) at the RL or sample result, whichever is higher.
Matrix Spike/Matrix Spike Duplicate	MS/MSD recoveries out of criteria for several metals. Most metals with issues had high concentrations in native samples. Antimony had evidence of matrix effects (low bias). All antimony results validated as estimated (J, UJ).
Laboratory Control Sample	No issues
Duplicate Samples	No issues
Other Non-conformances	No other non-conformances noted during analysis.
Overall Assessment of Data	All antimony, beryllium, and chromium project sample results less than the RL or 5x the blank result validated as non-detect (U) at the RL or sample result, whichever is higher. All antimony results validated as estimated (J, UJ).

SDG No. UF15015

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 4 Soil, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	VOC 8260C, SVOC 8270	VPH/EPH
Preservation and Holding Times	No issues	Multiple EPH samples re-analyzed out of hold time due to unreportable initial results. No action taken.
Blanks	No issues	No issues
Deuterated Monitoring Compound or Surrogate Spikes	Surrogates out due to matrix interference and/or sample dilution. No action taken.	Surrogates out due to matrix interference and/or sample dilution. No action taken.
Matrix Spike/Matrix Spike Duplicate	MS/MSD recoveries for multiple VOCs out of criteria. Since naphthalene, acetone, cyclohexane, and isopropylbenzene are potential site COCs, these exceedances show relevant potential bias. All naphthalene, acetone, cyclohexane, and isopropylbenzene results validated as estimated (J, UJ). MS/MSD recoveries for SVOC analysis almost universally out of criteria very low. However, this is likely due to high dilution used in analysis making most analytes ND. No action taken.	C9-C10 aromatics recoveries out of criteria. Likely due to high native sample concentrations. No action taken.
Laboratory Control Sample	VOCs acetone and 1,1-DCE (see discussion above) and SVOCs hexachlorocyclopentadiene and 3-nitroaniline out of criteria. RPDs out for several compounds. SVOCs are poorly performing compounds, no action taken.	No issues
Internal Standards	No issues	No issues
Tentatively Identified Compounds	No TICs identified by the lab.	N/A

Case Narrative
Ramboll US Corporation
Lot Number: UF15015

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

Where applicable, all soil sample analysis are reported on a dry weight basis unless flagged with a "W" qualifier

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

Volatiles
The laboratory control sample (LCS) associated with batch 19923 had 1,1-dichloroethene recovered above the acceptance limits. This could potentially result in a high bias on analytical results. There were no detections for this compound in the samples associated with this batch; therefore, data quality is not impacted.

The laboratory control sample duplicate (LCSD) associated with batch 20424 had acetone recovered marginally outside of the acceptance limits a number of RPDs exceeded the acceptance limits. Due to the large number of analytes in the LCS, there is a high statistical probability of a few analytes outside of control limits. Per SW-846 Update V 8000D- 23 Revision 4 July 2014, a number of analytes should be allowed to marginally fail the limits without requirement for corrective action. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria.

The matrix spike/matrix spike duplicate (MS/MSD) associated with sample -003 had multiple compounds and one surrogate recovered outside of the acceptance limits. Additionally, one RPD exceeded the acceptance limit. The LCS was recovered within the required acceptance limits; therefore, this likely demonstrates a matrix effect.

Sample -003 had internal standards recovered below the acceptance limits due to confirmed matrix interference.

Sample -003 had surrogates recovered outside of the acceptance limits due to confirmed matrix interference.

Semivolatiles
The LCS associated with batch 19960 had hexachlorocyclopentadiene and 3-nitroaniline recovered marginally outside of the acceptance limits. Due to the large number of analytes in the LCS, there is a high statistical probability of a few analytes outside of control limits. Per SW-846 Update V 8000D- 23 Revision 4 July 2014, a number of analytes should be allowed to marginally fail the limits without

requirement for corrective action. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria.

The MS/MSD associated with sample -003 had multiple compounds and surrogates recovered outside of the acceptance limits. Additionally, a number of RPDs exceeded the acceptance limit. The LCS was recovered within the required acceptance limits; therefore, this likely demonstrates a matrix effect.

Samples -001, -003, and -004 were diluted 50X, 50X, and 5X, respectively, due to the sample matrix. The reporting limits have been raised accordingly. The associated surrogates were recovered outside of the acceptance limits. No corrective action was required, as dilutions of 5X and greater impact recovery accuracy.

Montana EPH
Samples -001 and -004 were in a batch that required re-extraction and re-analysis outside of the holding time. Due to analyst error, the original results are not reportable and only out of hold results were reported for these samples.

Montana VPH
Samples -001, -003, and -004 had naphthalene detected in the VPH analysis and confirmed via dual detector analysis (FID/PID). However, additional compounds elute at approximately the same times as naphthalene, making it difficult for analysts to distinguish the target compounds from non-

target compounds. Second method confirmation was performed via GC/MS analysis. The results via dual detection (FID/PID) were not compared to or adjusted based on results via 8260B GC/MS. The MS/MSD associated with sample -003 had C9-C10 Aromatics and C9-C12 Aliphatics, adjusted recovered outside of the acceptance limits. Additionally, the RPD for C9-C12 Aliphatics, adjusted exceeded the acceptance limit. The LCS was recovered within the required acceptance limits; therefore, this likely demonstrates a matrix effect.

Sample -001 had surrogates recovered outside of the acceptance limits due to objective evidence of matrix interference.

Metals
The method blank associated with batch 20301 had antimony, beryllium, and chromium detected at a concentration that was below the LOQ. All samples associated with this method blank that have detections for these metals have been flagged with a "B" qualifier.

The MS/MSD associated with sample -003 had multiple metals recovered outside of the acceptance limits. The LCS was recovered within the required acceptance limits; therefore, this likely demonstrates a matrix effect.

Sample Receipt Checklist (SRC)

Client: Ramboll US Corporation Cooler Inspected by/date: JSH / 06/15/19 Lot #: UF15015

Means of receipt: ☐ SESI ☐ Client ☐ UPS ☑ FedEx ☐ Other: _____

☑ Yes	☐ No		1. Were custody seals present on the cooler?
☑ Yes	☐ No	☐ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: NA Chlorine Strip ID: NA Tested by: NA

Original temperature upon receipt / Derived (Corrected) temperature upon receipt %Solid Snap-Cup ID: 19-611

3.1 / 3.1 °C NA / NA °C NA / NA °C NA / NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 6 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☑ Yes	☐ No	☐ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☑ Yes	☐ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼" or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.

Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is ***no***) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

SR barcode labels applied by: JSH Date: 06/15/19

Comments: 1 of 2 vials for the trip blanks has a bubble in it.

MEMO

Subject: **Calumet Montana Refining**
Data Usability Assessment
Methods 8260C, 8270, 6020A, MT EPH/VPH
SDG UF18024, 4 Soil Samples, 1 Water Sample

Data validation and usability assessment was conducted for data package UF18024 based on the National Functional Guidelines for Superfund Organic Methods Data Review OSWER 9355.0-132, EPA-540-R-014-002 (USEPA August 2014) and National Functional Guidelines for Superfund Inorganic Methods Data Review (USEPA August 2014). The following samples were reported in this data package:

Sample ID	Lab Sample ID
CMR-WB09-2.0-3.0-190617	UF18024-001
CMR-WB09-6.0-6.75-190617	UF18024-002
CMR-WB08-5.0-6.0-190617	UF18024-003
CMR-WB07-5.0-6.0-190617	UF18024-004
TB-13-20190617	UF18024-005

Data validation included a review of the following QC parameters:

- Data Package Completeness
- Preservation and Holding Times
- Instrument Performance Check
- Blanks
- Deuterated Monitoring Compound or Surrogate Spikes
- Matrix Spike/Matrix Spike Duplicate
- Field Duplicate Samples
- Laboratory Control Sample
- Internal Standards
- Tentatively Identified Compounds
- System Performance
- Overall Assessment of Data

QC criteria were met for each parameter with the following exceptions:

Surrogates/Internal Standards
Surrogates and/or internal standards were out of criteria for several samples analyzes. Surrogates out of criteria can indicate a possible accuracy bias. However, according to the lab narrative the recovery issues were likely due to sample dilutions or matrix effects. Therefore no results have been validated.

LCS/LCSD Recoveries
During analysis LCS/LCSD samples were run and recoveries were reported. These recoveries were largely in criteria with the exception of methyl acetate, acetone, and methylcyclohexane. The out of criteria recoveries indicate a possible bias. Low recoveries indicate a possible low bias and high recoveries indicate a possible high bias. In general, high bias does not affect non-detect results. Based on the potential bias all methyl acetate, acetone, and methylcyclohexane results have been validated as estimated.

Blank Detections
During analysis, chromium was detected in method blank samples. This indicates a possible cross-contamination issue. Due to this, all low level detections should be evaluated for possible contamination bias. All chromium results below the RL or below 5x the blank result have been validated as non-detect (U).

Overall Assessment of Data
Overall, data are acceptable and usable for project objectives. The laboratory flags (*, F1) to denote out of criteria results were removed. Several results were flagged J by the laboratory because the concentrations calculated were below the method reporting limit and above the laboratory detection limit. The J flag was retained. These results should be considered estimated as the calculated concentrations are below the instrument calibration range.

No additional validation actions were taken on project samples. Results are usable for project purposes as validated.

Inorganic Data Review Summary

SDG No. UF18024

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 4 Soil, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	Metals (Modified Skinner List)
Preservation and Holding Times	No issues
Blanks	Chromium detected in method blank sample. All chromium project sample results less than the RL or 5x the blank result validated as non-detect (U) at the RL or sample result, whichever is higher.
Matrix Spike/Matrix Spike Duplicate	No MS/MSD results reported with samples. No action taken.
Laboratory Control Sample	No issues
Duplicate Samples	No issues
Other Non-conformances	No other non-conformances noted during analysis.
Overall Assessment of Data	All chromium project sample results less than the RL or 5x the blank result validated as non-detect (U) at the RL or sample result, whichever is higher.

SDG No. UF18024

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 4 Soil, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	VOC 8260C, SVOC 8270	VPH/EPH
Preservation and Holding Times	No issues	No issues
Blanks	No issues	No issues
Deuterated Monitoring Compound or Surrogate Spikes	Surrogates out of criteria due to matrix effects. No action taken.	Surrogates out of criteria due to matrix effects. No action taken.
Matrix Spike/Matrix Spike Duplicate	No MS/MSD results reported with samples. No action taken.	No MS/MSD results reported with samples. No action taken.
Laboratory Control Sample	VOC methyl acetate, acetone, and methylcyclohexane out of criteria. All methyl acetate, acetone, and methylcyclohexane results validated as estimated (J, UJ). SVOCs hexachlorocyclopentadiene and 3-aniline out of criteria. Not site COCs, no action taken.	No issues
Internal Standards	No issues	No issues
Tentatively Identified Compounds	No TICs identified.	N/A
Other Non-conformances	No other non-conformances noted.	No other non-conformances noted.
Overall Assessment of Data	All methyl acetate, acetone, and methylcyclohexane results validated as estimated (J, UJ).	No validation action warranted.

Case Narrative
Ramboll US Corporation
Lot Number: UF18024

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

Where applicable, all soil sample analysis are reported on a dry weight basis unless flagged with a "W" qualifier

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

Volatiles
The laboratory control sample (LCS) associated with batch 20330 had acetone recovered marginally outside of the acceptance limits. The LCS associated with batches 20364 and 21175 had methylcyclohexane recovered marginally outside of the acceptance limits. The LCS associated with batch 21174 had methyl acetate recovered marginally outside of the acceptance limits. Due to the large number of analytes in the LCS, there is a high statistical probability of a few analytes outside of control limits. Per SW-846 Update V 8000D- 23 Revision 4 July 2014, a number of analytes should be allowed to marginally fail the limits without requirement for corrective action. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria.

Sample -003 was analyzed high level due to the sample matrix. The reporting limits have been raised accordingly.

Semivolatiles
The LCS associated with batch 19960 had hexachlorocyclopentadiene and 3-nitroaniline recovered marginally outside of the acceptance limits. Due to the large number of analytes in the LCS, there is a high statistical probability of a few analytes outside of control limits. Per SW-846 Update V 8000D- 23 Revision 4 July 2014, a number of analytes should be allowed to marginally fail the limits without requirement for corrective action. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria.

Due to the sample matrix, samples -001, -002, and -003 were diluted 5X, 200X, and 5X, respectively. The reporting limits have been raised accordingly. The associated surrogates were recovered outside of the acceptance limits. No corrective action was required, as dilutions of 5X and greater impact recovery accuracy.

Montana VPH
Samples -002 and -003 had naphthalene detected in the VPH analysis and confirmed via dual detector analysis (FID/PID). However, additional compounds elute at approximately the same times as

naphthalene, making it difficult for analysts to distinguish the target compounds from non-target compounds. Second method confirmation was performed via GC/MS analysis. The results via dual detection (FID/PID) were not compared to or adjusted based on results via 8260B GC/MS.

Samples -002 and -003 had surrogates recovered outside of the acceptance limits due to objective evidence of matrix interference.

Metals
The method blank associated with batch 20445 had chromium detected at a concentration that was below the LOQ. All samples associated with this method blank that have detections for chromium have been flagged with a “B” qualifier.

☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote #: NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is ***no***) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

MEMO

Date: **July 19, 2019**

To: **File**

From: **Rob Huening, Ramboll**

cc: **Daniel J Price, Ramboll**

Subject: **Calumet Montana Refining**
Data Usability Assessment
Methods 8260C, 8270, 6020A, MT EPH/VPH
SDG UF18034, 3 Groundwater Samples, 1 Water Sample

Data validation and usability assessment was conducted for data package UF18034 based on the National Functional Guidelines for Superfund Organic Methods Data Review OSWER 9355.0-132, EPA-540-R-014-002 (USEPA August 2014) and National Functional Guidelines for Superfund Inorganic Methods Data Review (USEPA August 2014). The following samples were reported in this data package:

Sample ID	Lab Sample ID
CMR-EB04D-190617-GW	UF18034-001
CMR-MW81S-190617-GW	UF18034-002
CMR-MW81D-190617-GW	UF18034-003
TB-14-20190617	UF18034-004

Data validation included a review of the following QC parameters:

- Data Package Completeness
- Preservation and Holding Times
- Instrument Performance Check
- Blanks
- Deuterated Monitoring Compound or Surrogate Spikes
- Matrix Spike/Matrix Spike Duplicate
- Field Duplicate Samples
- Laboratory Control Sample
- Internal Standards
- Tentatively Identified Compounds
- System Performance
- Overall Assessment of Data

QC criteria were met for each parameter with the following exceptions:

MS/MSD Recoveries
For the SVOC analysis suite MS/MSD results were reported to be almost universally out of criteria with extremely low recoveries. However, this is largely due to non-detected analytes. The MS/MSD sample was spike at a normal level but due to high native concentrations/ matrix issues, the sample was run at a high dilution. Therefore the spiked amount was at or below the reporting limit. Due to this, the low recoveries do not represent a systematic matrix issue. No validation action warranted.

Surrogates/Internal Standards
Surrogates and/or internal standards were out of criteria for several samples analyzes. Surrogates out of criteria can indicate a possible accuracy bias. However, according to the lab narrative the recovery issues were likely due to sample dilutions or matrix effects. Therefore no results have been validated.

LCS/LCSD Recoveries
During analysis LCS/LCSD samples were run and recoveries were reported. These recoveries were largely in criteria with the exception of methyl acetate. The out of criteria recoveries indicate a possible bias. Low recoveries indicate a possible low bias and high recoveries indicate a possible high bias. In general, high bias does not affect non-detect results. Based on the potential bias all methyl acetate results have been validated as estimated.

Blank Detections
During analysis, chromium and bis(2-ethylhexyl)phthalate were detected in method blank samples. This indicates a possible cross-contamination issue. Due to this, all low level detections should be evaluated for possible contamination bias. All chromium and bis(2-ethylhexyl)phthalate results below the RL or below 5x the blank result have been validated as non-detect (U).

Overall Assessment of Data
Overall, data are acceptable and usable for project objectives. The laboratory flags (*, F1) to denote out of criteria results were removed. Several results were flagged J by the laboratory because the concentrations calculated were below the method reporting limit and above the laboratory detection limit. The J flag was retained. These results should be considered estimated as the calculated concentrations are below the instrument calibration range.

No additional validation actions were taken on project samples. Results are usable for project purposes as validated.

Attachment 1: Data Validation Summary Checklist

Inorganic Data Review Summary

SDG No. UF18034

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 3 GW, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	Metals (Modified Skinner List)
Preservation and Holding Times	No issues
Blanks	Chromium detected in method blank sample. All chromium project sample results less than the RL or 5x the blank result validated as non-detect (U) at the RL or sample result, whichever is higher.
Matrix Spike/Matrix Spike Duplicate	No MS/MSD results reported with samples. No action taken.
Laboratory Control Sample	No issues
Duplicate Samples	No issues
Other Non-conformances	No other non-conformances noted during analysis.
Overall Assessment of Data	All chromium project sample results less than the RL or 5x the blank result validated as non-detect (U) at the RL or sample result, whichever is higher.

SDG No. UF18034

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 3 GW, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	VOC 8260C, SVOC 8270	VPH/EPH
Preservation and Holding Times	No issues	No issues
Blanks	SVOC bis(2-ethylhexyl)phthalate detected in method blank sample. All project sample detections (all below the RL) validated as non-detect (U).	No issues
Deuterated Monitoring Compound or Surrogate Spikes	No issues	Surrogates out of criteria due to matrix effects. No action taken.
Matrix Spike/Matrix Spike Duplicate	MS/MSD out of criteria for multiple SVOCs, likely due to dilution required.. 3&4-methylphenol and phenol validated as estimated (J, UJ).	No MS/MSD results reported with samples. No action taken.
Laboratory Control Sample	VOC methyl acetate out of criteria. All methyl acetate results validated as estimated (J, UJ). SVOCs 2-chlorophenol and 4-nitrophenol out of criteria. Not site COCs, no action taken.	No issues
Internal Standards	No issues	No issues
Tentatively Identified Compounds	No TICs identified.	N/A
Other Non-conformances	No other non-confromances noted.	No other non-conformances noted.
Overall Assessment of Data	All bis(2-ethylhexyl)phthalate project sample detections (all below the RL) validated as non-detect (U). 3&4-methylphenol and phenol validated as estimated (J, UJ). All methyl acetate results validated as estimated (J, UJ).	No validation action warranted.

Case Narrative
Ramboll US Corporation
Lot Number: UF18034

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

Volatiles
The laboratory control sample (LCS) associated with batch 20584 had methyl acetate recovered marginally outside of the acceptance limits. Due to the large number of analytes in the LCS, there is a high statistical probability of a few analytes outside of control limits. Per SW-846 Update V 8000D- 23 Revision 4 July 2014, a number of analytes should be allowed to marginally fail the limits without requirement for corrective action. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria.

Semivolatiles
The method blank associated with batch 19982 had bis(2-ethylhexyl)phthalate detected at a concentration that was below the LOQ. All samples associated with this method blank that have detections for bis(2-ethylhexyl)phthalate have been flagged with a “B” qualifier.

The LCS associated with batch 19982 had 2-chlorphenol and 4-nitrophenol recovered marginally outside of the acceptance limits. Due to the large number of analytes in the LCS, there is a high statistical probability of a few analytes outside of control limits. Per SW-846 Update V 8000D- 23 Revision 4 July 2014, a number of analytes should be allowed to marginally fail the limits without requirement for corrective action. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria.

The matrix spike/matrix spike duplicate (MS/MSD) associated with sample -002 had multiple recovered outside of the acceptance limits. Additionally, one RPD exceeded the acceptance limit. The LCS was recovered within the required acceptance limits; therefore, this likely demonstrates a matrix effect.

Samples -001, -002, and -003 were diluted 10X due to the sample matrix. The reporting limits have been raised accordingly.

Montana VPH
Samples -001, -002, and -003 had naphthalene detected in the VPH analysis and confirmed via dual detector analysis (FID/PID). However, additional compounds elute at approximately the same times as naphthalene, making it difficult for analysts to distinguish the target compounds from non-target compounds. Second method confirmation was performed via GC/MS analysis. The results via dual detection (FID/PID) were not compared to or adjusted based on results via 8260B GC/MS.

Samples -001 and -002 had surrogates recovered outside of the acceptance limits due to objective evidence of matrix interference.

Metals
The method blank associated with batch 20200 had chromium detected at a concentration that was below the LOQ. All samples associated with this method blank that have detections for chromium have been flagged with a “B” qualifier.

LOQ = Limit of Quantitation
B = Detected in the method blank
E = Quantitation of compound exceeded the calibration range
DL = Detection Limit
ND = Not detected at or above the DL
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
J = Estimated result < LOQ and ≥ DL
H = Out of holding time
W = Reported on wet weight basis

LOQ = Limit of Quantitation
B = Detected in the method blank
E = Quantitation of compound exceeded the calibration range
DL = Detection Limit
ND = Not detected at or above the DL
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
J = Estimated result < LOQ and ≥ DL
H = Out of holding time
W = Reported on wet weight basis

LOQ = Limit of Quantitation
DL = Detection Limit
LOD = Limit of Detection

P = The RPD between two GC columns exceeds 40%
J = Estimated result < LOQ and ≥ DL
ND = Not detected at or above the DL

N = Recovery is out of criteria
+ = RPD is out of criteria

Note: Calculations are performed before rounding to avoid round-off errors in calculated results

Sample Receipt Checklist (SRC)

Client: Ramboll Cooler Inspected by/date: JSH / 06/18/19 Lot #: UF18034

Means of receipt: ☐ SESI ☐ Client ☐ UPS ☑ FedEx ☐ Other: _____

☑ Yes	☐ No		1. Were custody seals present on the cooler?
☑ Yes	☐ No	☐ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: 18-2225 Chlorine Strip ID: NA Tested by: JSH

Original temperature upon receipt / Derived (Corrected) temperature upon receipt %Solid Snap-Cup ID: NA

4.4 / 4.4 °C NA / NA °C NA / NA °C NA / NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 6 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☑ Yes	☐ No	☐ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)? _____
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☑ Yes	☐ No	☐ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☑ Yes	☐ No		21. Was the quote number listed on the container label? If yes, Quote # 21552

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.

Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is ***no***) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

Subject: **Calumet Montana Refining**
Data Usability Assessment
Methods 8260C, 8270, 6020A, MT EPH/VPH
SDG UF19039, 6 Soil Samples, 1 Water Sample

Data validation and usability assessment was conducted for data package UF19039 based on the National Functional Guidelines for Superfund Organic Methods Data Review OSWER 9355.0-132, EPA-540-R-014-002 (USEPA August 2014) and National Functional Guidelines for Superfund Inorganic Methods Data Review (USEPA August 2014). The following samples were reported in this data package:

Sample ID	Lab Sample ID
CMR-WB13-3.0-3.5-190618	UF19039-001
CMR-WB13-3.0-3.5-190618-DUP	UF19039-002
CMR-WB12-0.0-1.0-190618	UF19039-003
CMR-WB12-2.0-2.5-190618	UF19039-004
CMR-WB11-1.0-2.0-190618	UF19039-005
CMR-WB11-3.0-3.9-190618	UF19039-006
TB-15-20190618	UF19039-007

Data validation included a review of the following QC parameters:

- Data Package Completeness
- Preservation and Holding Times
- Instrument Performance Check
- Blanks
- Deuterated Monitoring Compound or Surrogate Spikes
- Matrix Spike/Matrix Spike Duplicate
- Field Duplicate Samples
- Laboratory Control Sample
- Internal Standards
- Tentatively Identified Compounds
- System Performance
- Overall Assessment of Data

QC criteria were met for each parameter with the following exceptions:

Surrogates/Internal Standards
Surrogates and/or internal standards were out of criteria for several samples analyzes. Surrogates out of criteria can indicate a possible accuracy bias. However, according to the lab narrative the recovery issues were likely due to sample dilutions or matrix effects. Therefore no results have been validated.

LCS/LCSD Recoveries
During analysis LCS/LCSD samples were run and recoveries were reported. These recoveries were largely in criteria with the exception of methylcyclohexane and butyl benzyl phthalate. The out of criteria recoveries indicate a possible bias. Low recoveries indicate a possible low bias and high recoveries indicate a possible high bias. In general, high bias does not affect non-detect results. Based on the potential bias all methylcyclohexane and butyl benzyl phthalate results have been validated as estimated.

Field Duplicate Samples
One field duplicate sample was submitted with project samples in order to evaluate precision. In general analytes detected above the reporting limit showed acceptable precision. However, barium and copper had results with RPDs above 50% indicating a possible precision issue. Due to this, all detected copper and barium results were validated as estimated (J).

Blank Detections
During analysis, bi-n-butylphthalate was detected in method blank samples. This indicates a possible cross-contamination issue. Due to this, all low level detections should be evaluated for possible contamination bias. All di-n-butylphthalate results below the RL or below 5x the blank result have been validated as non-detect (U).

Overall Assessment of Data
Overall, data are acceptable and usable for project objectives. The laboratory flags (*, F1) to denote out of criteria results were removed. Several results were flagged J by the laboratory because the concentrations calculated were below the method reporting limit and above the laboratory detection limit. The J flag was retained. These results should be considered estimated as the calculated concentrations are below the instrument calibration range.

No additional validation actions were taken on project samples. Results are usable for project purposes as validated.

Inorganic Data Review Summary

SDG No. UF19039

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 6 Soil, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	Metals (Modified Skinner List)
Preservation and Holding Times	No issues
Blanks	No issues
Matrix Spike/Matrix Spike Duplicate	MS/MSD recoveries slightly out of criteria likely due to high native sample concentrations. No action taken.
Laboratory Control Sample	No issues
Duplicate Samples	One field duplicate submitted with samples. Barium and copper show precision bias. All barium and copper detections validated as estimated (J).
Other Non-conformances	No other non-conformances noted during analysis.
Overall Assessment of Data	All barium and copper detections validated as estimated (J).

SDG No. UF19039

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 6 Soil, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	VOC 8260C, SVOC 8270	VPH/EPH
Preservation and Holding Times	No issues	No issues
Blanks	di-n-butylphthalate detected below the RL in method blank sample. All di-n-butylphthalate results less than 5x the blank result validated as non-detect (U).	
Deuterated Monitoring Compound or Surrogate Spikes	Surrogates out due to sample dilutions/matrix effects. No action taken.	Surrogates out due to sample dilutions/matrix effects. No action taken.
Matrix Spike/Matrix Spike Duplicate	No MS/MSD results reported with samples. No action taken.	No MS/MSD results reported with samples. No action taken.
Laboratory Control Sample	LCS out high for VOC methylcyclohexane and SVOC butyl benzyl phthalate. All methylcyclohexane and butyl benzyl phthalate detections validated as estimated (J).	No issues
Field Duplicates	One field duplicate sample submitted with project samples. Results show acceptable agreement. No action taken.	One field duplicate submitted with samples. No detections in parent or duplicate samples. No action taken.
Internal Standards	No issues	No issues
Tentatively Identified Compounds	No TICs identified by the lab.	N/A
Other Non-conformances	No other non-conformances noted by the lab.	No other non-conformances noted by the lab.
Overall Assessment of Data	All di-n-butylphthalate results less than 5x the blank result validated as non-detect (U). All methylcyclohexane and butyl benzyl phthalate detections validated as estimated (J).	No validation action warranted.

Case Narrative
Ramboll US Corporation
Lot Number: UF19039

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

Where applicable, all soil sample analysis are reported on a dry weight basis unless flagged with a "W" qualifier

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

Volatiles
The laboratory control sample (LCS) associated with batch 20364 had methylcyclohexane recovered marginally outside of the acceptance limits. The LCS associated with batch 21174 had methyl acetate recovered marginally outside of the acceptance limits. Due to the large number of analytes in the LCS, there is a high statistical probability of a few analytes outside of control limits. Per SW-846 Update V 8000D- 23 Revision 4 July 2014, a number of analytes should be allowed to marginally fail the limits without requirement for corrective action. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria.

Sample -004 was analyzed high level due to the sample matrix. The reporting limits have been raised accordingly.

Semivolatiles
The method blank associated with batch 20184 had di-n-butyl phthalate detected at a concentration that was below the LOQ. All samples associated with this method blank that have detections for di-n-butyl phthalate have been flagged with a “B” qualifier.

The LCS associated with batch 20184 had butyl benzyl phthalate recovered marginally outside of the acceptance limits. Due to the large number of analytes in the LCS, there is a high statistical probability of a few analytes outside of control limits. Per SW-846 Update V 8000D- 23 Revision 4 July 2014, a number of analytes should be allowed to marginally fail the limits without requirement for corrective action. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria.

Due to the sample matrix, samples -004 and -005 were diluted 100X. The reporting limits have been raised accordingly. Sample -006 was diluted 100X due to high concentrations of target compounds. The associated surrogates were recovered outside of the acceptance limits. No corrective action was required, as dilutions of 5X and greater impact recovery accuracy.

Montana VPH
Samples -004, -005, and -006 had naphthalene detected in the VPH analysis and confirmed via dual detector analysis (FID/PID). However, additional compounds elute at approximately the same times as naphthalene, making it difficult for analysts to distinguish the target compounds from non-target compounds. Second method confirmation was performed via GC/MS analysis. The results via dual detection (FID/PID) were not compared to or adjusted based on results via 8260B GC/MS.

Samples -004, -005 and -006 had surrogates recovered outside of the acceptance limits due to objective evidence of matrix interference.

Metals
The matrix spike/matrix spike duplicate (MS/MSD) associated with sample -001 had multiple metals recovered outside of the acceptance limits. Additionally, one RPD exceeded the acceptance limit. The LCS was recovered within the required acceptance limits; therefore, this likely demonstrates a matrix effect.

1,1,2-Trichloro-1,2,2-Trifluoroethane	76-13-1	8260B	ND		4.7	1.9	ug/kg	1

LOQ = Limit of Quantitation
B = Detected in the method blank
E = Quantitation of compound exceeded the calibration range
DL = Detection Limit
ND = Not detected at or above the DL
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
J = Estimated result < LOQ and ≥ DL
H = Out of holding time
W = Reported on wet weight basis

Sample Receipt Checklist (SRC)

Client: RAMBOLL Cooler Inspected by/date: LKH / 06/19/19 Lot #: UF19039

Means of receipt: ☐ SESI ☐ Client ☐ UPS ☑ FedEx ☐ Other: _____

☑ Yes	☐ No		1. Were custody seals present on the cooler?
☑ Yes	☐ No	☐ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: NA Chlorine Strip ID: NA Tested by: NA

Original temperature upon receipt / Derived (Corrected) temperature upon receipt %Solid Snap-Cup ID: 19-611

2.6 / 2.6 °C NA / NA °C NA / NA °C NA / NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 6 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☑ Yes	☐ No	☐ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)? _____
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.

Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is ***no***) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

MEMO

Date: **July 22, 2019**

To: **File**

From: **Rob Huening, Ramboll**

cc: **Daniel J Price, Ramboll**

Subject: **Calumet Montana Refining**
Data Usability Assessment
Methods 8260C, 8270, 6020A, MT EPH/VPH
SDG UF19040, 3 Groundwater Samples, 1 Water Sample

Data validation and usability assessment was conducted for data package UF19040 based on the National Functional Guidelines for Superfund Organic Methods Data Review OSWER 9355.0-132, EPA-540-R-014-002 (USEPA August 2014) and National Functional Guidelines for Superfund Inorganic Methods Data Review (USEPA August 2014). The following samples were reported in this data package:

Sample ID	Lab Sample ID
CMR-WB07-190618-GW	UF19040-001
CMR-WB08-190618-GW	UF19040-002
CMR-WB09S-190618-GW	UF19040-003
TB-16-20190618	UF19040-004

Data validation included a review of the following QC parameters:

- Data Package Completeness
- Preservation and Holding Times
- Instrument Performance Check
- Blanks
- Deuterated Monitoring Compound or Surrogate Spikes
- Matrix Spike/Matrix Spike Duplicate
- Field Duplicate Samples
- Laboratory Control Sample
- Internal Standards
- Tentatively Identified Compounds
- System Performance
- Overall Assessment of Data

QC criteria were met for each parameter with the following exceptions:

Blank Detections
During analysis, chromium was detected in method blank samples. This indicates a possible cross-contamination issue. Due to this, all low level detections should be evaluated for possible contamination bias. All chromium results below the RL or below 5x the blank result have been validated as non-detect (U).

Overall Assessment of Data
Overall, data are acceptable and usable for project objectives. The laboratory flags (*, F1) to denote out of criteria results were removed. Several results were flagged J by the laboratory because the concentrations calculated were below the method reporting limit and above the laboratory detection limit. The J flag was retained. These results should be considered estimated as the calculated concentrations are below the instrument calibration range.

No additional validation actions were taken on project samples. Results are usable for project purposes as validated.

Inorganic Data Review Summary

SDG No. UF19040

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 3 GW, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	Metals (Modified Skinner List)
Preservation and Holding Times	No issues
Blanks	Chromium detected in method blank sample. All Cr detections (all below the RL) validated as non-detect (U).
Matrix Spike/Matrix Spike Duplicate	No MS/MSD results reported with samples. No action taken.
Laboratory Control Sample	No issues
Duplicate Samples	No issues
Other Non-conformances	No other non-conformances noted during analysis.
Overall Assessment of Data	All Cr detections (all below the RL) validated as non-detect (U).

SDG No. UF19040

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 3 GW, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	VOC 8260C, SVOC 8270	VPH/EPH
Preservation and Holding Times	No issues	No issues
Blanks	No issues	No issues
Deuterated Monitoring Compound or Surrogate Spikes	No issues	No issues
Matrix Spike/Matrix Spike Duplicate	No MS/MSDs reported with results. No action taken.	No MS/MSDs reported with results. No action taken.
Laboratory Control Sample	No issues	No issues
Internal Standards	No issues	No issues
Tentatively Identified Compounds	No TICs identified by the lab. No action taken.	N/A
Other Non-conformances	RLs raised due to dilutions. No action taken.	No other non-conformances noted.
Overall Assessment of Data	No validation action warranted.	No validation action warranted.

Case Narrative
Ramboll US Corporation
Lot Number: UF19040

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

Semivolatiles
Sample -003 was diluted 5X due to the sample matrix. The reporting limits have been raised accordingly.

Montana VPH
Sample -003 had naphthalene detected in the VPH analysis and confirmed via dual detector analysis (FID/PID). However, additional compounds elute at approximately the same times as naphthalene, making it difficult for analysts to distinguish the target compounds from non-target compounds. Second method confirmation was performed via GC/MS analysis. The results via dual detection (FID/PID) were not compared to or adjusted based on results via 8260B GC/MS.

Metals
The method blank associated with batch 20200 had chromium detected at a concentration that was below the LOQ. All samples associated with this method blank that have detections for chromium have been flagged with a “B” qualifier.

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☑ Yes	☐ No	☐ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☑ Yes	☐ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☑ Yes	☐ No	☐ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA _____ were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA _____.
Time of preservation NA _____. If more than one preservative is needed, please note in the comments below.

Sample(s) 004(2) _____ were received with bubbles >6 mm in diameter.

Samples(s) NA _____ were received with TRC > 0.5 mg/L (If #19 is *no*) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA _____.

MEMO

Date: **July 22, 2019**

To: **File**

From: **Rob Huening, Ramboll**

cc: **Daniel J Price, Ramboll**

Subject: **Calumet Montana Refining**
Data Usability Assessment
Methods 8260C, 8270, 6020A, MT EPH/VPH
SDG UF21028, 3 Soil Samples, 1 Water Sample

Data validation and usability assessment was conducted for data package UF21028 based on the National Functional Guidelines for Superfund Organic Methods Data Review OSWER 9355.0-132, EPA-540-R-014-002 (USEPA August 2014) and National Functional Guidelines for Superfund Inorganic Methods Data Review (USEPA August 2014). The following samples were reported in this data package:

Sample ID	Lab Sample ID
CMR-WB05-7.5-8.5-190619	UF21028-001
CMR-WB05-8.0-9.0-190619	UF21028-002
CMR-WB05-5.0-6.0-190619	UF21028-003
TB-17-20190619	UF21028-004

Data validation included a review of the following QC parameters:

- Data Package Completeness
- Preservation and Holding Times
- Instrument Performance Check
- Blanks
- Deuterated Monitoring Compound or Surrogate Spikes
- Matrix Spike/Matrix Spike Duplicate
- Field Duplicate Samples
- Laboratory Control Sample
- Internal Standards
- Tentatively Identified Compounds
- System Performance
- Overall Assessment of Data

QC criteria were met for each parameter with the following exceptions:

Surrogates/Internal Standards
Surrogates and/or internal standards were out of criteria for several samples analyzes. Surrogates out of criteria can indicate a possible accuracy bias. However, according to the lab narrative the recovery issues were likely due to sample dilutions or matrix effects. Therefore no results have been validated.

LCS/LCSD Recoveries
During analysis LCS/LCSD samples were run and recoveries were reported. These recoveries were largely in criteria with the exception of bromomethane and methyl acetate. The out of criteria recoveries indicate a possible bias. Low recoveries indicate a possible low bias and high recoveries indicate a possible high bias. In general, high bias does not affect non-detect results. Based on the potential bias all bromomethane and methyl acetate results have been validated as estimated.

Overall Assessment of Data
Overall, data are acceptable and usable for project objectives. The laboratory flags (*, F1) to denote out of criteria results were removed. Several results were flagged J by the laboratory because the concentrations calculated were below the method reporting limit and above the laboratory detection limit. The J flag was retained. These results should be considered estimated as the calculated concentrations are below the instrument calibration range.

No additional validation actions were taken on project samples. Results are usable for project purposes as validated.

Inorganic Data Review Summary

SDG No. UF21028

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 3 Soil, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	Metals (Modified Skinner List)
Preservation and Holding Times	No issues
Blanks	No issues
Matrix Spike/Matrix Spike Duplicate	No issues
Laboratory Control Sample	No issues
Duplicate Samples	No issues
Other Non-conformances	No other non-conformances noted during analysis.
Overall Assessment of Data	No validation action warranted.

SDG No. UF21028

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 3 Soil, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	VOC 8260C, SVOC 8270	VPH/EPH
Preservation and Holding Times	No issues	No issues
Blanks	Multiple compounds detected in method blank with no other detections. No action taken.	Benzene detected in method blank with no sample detections. No action taken.
Deuterated Monitoring Compound or Surrogate Spikes	No issues	Surrogates out due to matrix interferences. No action taken.
Matrix Spike/Matrix Spike Duplicate	No MS/MSDs reported with results. No action taken.	No MS/MSDs reported with results. No action taken.
Laboratory Control Sample	LCS out low for bromomethane and methyl acetate. Bromomethane and methyl acetate results validated as estimated (J, UJ).	No issues
Internal Standards	No issues	No issues
Tentatively Identified Compounds	No TICs identified by the lab. No action taken.	N/A
Other Non-conformances	RLs raised due to dilutions. No action taken.	No other non-conformances noted.
Overall Assessment of Data	Bromomethane and methyl acetate results validated as estimated (J, UJ).	No validation action warranted.

Case Narrative
Ramboll US Corporation
Lot Number: UF21028

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

Where applicable, all soil sample analysis are reported on a dry weight basis unless flagged with a "W" qualifier

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

Volatiles
The method blank associated with batch 21394 had 1,2,3-trichlorobenzene and 1,2,4-trichlorobenzene detected at a concentration that was below the LOQ. There were no detections for these compounds in the samples associated with this method blank.

The laboratory control sample (LCS) associated with batch 21176 had bromomethane and methyl acetate recovered marginally outside of the acceptance limits. Due to the large number of analytes in the LCS, there is a high statistical probability of a few analytes outside of control limits. Per SW-846 Update V 8000D- 23 Revision 4 July 2014, a number of analytes should be allowed to marginally fail the limits without requirement for corrective action. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria.

Sample -002 was analyzed high level due to the sample matrix. The reporting limits have been raised accordingly.

Semivolatiles
The LCS associated with batch 21394 had methyl acetate recovered marginally outside of the acceptance limits. Due to the large number of analytes in the LCS, there is a high statistical probability of a few analytes outside of control limits. Per SW-846 Update V 8000D- 23 Revision 4 July 2014, a number of analytes should be allowed to marginally fail the limits without requirement for corrective action. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria.

Sample -002 was diluted 50X due to the sample matrix. The reporting limits have been raised accordingly. The associated surrogates were recovered outside of the acceptance limits. No corrective action was required, as dilutions of 5X and greater impact recovery accuracy.

Montana VPH
Sample -002 had naphthalene detected in the VPH analysis and confirmed via dual detector analysis (FID/PID). However, additional compounds elute at approximately the same times as naphthalene and

MTBE, making it difficult for analysts to distinguish the target compounds from non-target compounds. Second method confirmation was performed via GC/MS analysis. The results via dual detection (FID/PID) were not compared to or adjusted based on results via 8260B GC/MS.

The method blank associated with batches 21459 and 21735 had benzene detected at a concentration that was above ½ the LOQ. There were no detections for this compound in the samples associated with these method blanks.

Samples -002 and -003 had surrogates recovered outside of the acceptance limits due to confirmed matrix interference.

LOQ = Limit of Quantitation
B = Detected in the method blank
E = Quantitation of compound exceeded the calibration range
DL = Detection Limit
ND = Not detected at or above the DL
N = Recovery is out of criteria
P = The RPD between two GC columns exceeds 40%
J = Estimated result < LOQ and ≥ DL
H = Out of holding time
W = Reported on wet weight basis

Sample Receipt Checklist (SRC)

Client: RAMBOLL US CORP. Cooler Inspected by/date: LKH / 06-21-2019 Lot #: UF21028

Means of receipt: ☐ SESI ☐ Client ☐ UPS ☑ FedEx ☐ Other: _____

☑ Yes	☐ No		1. Were custody seals present on the cooler?
☑ Yes	☐ No	☐ NA	2. If custody seals were present, were they intact and unbroken?

pH Strip ID: NA Chlorine Strip ID: NA Tested by: NA

Original temperature upon receipt / Derived (Corrected) temperature upon receipt %Solid Snap-Cup ID: NA

2.9 /2.9 °C NA /NA °C NA /NA °C NA /NA °C

Method: ☑ Temperature Blank ☐ Against Bottles IR Gun ID: 6 IR Gun Correction Factor: 0 °C

Method of coolant: ☑ Wet Ice ☐ Ice Packs ☐ Dry Ice ☐ None

☐ Yes	☐ No	☑ NA	3. If temperature of any cooler exceeded 6.0°C, was Project Manager Notified? PM was Notified by: phone / email / face-to-face (circle one).
☑ Yes	☐ No	☐ NA	4. Is the commercial courier's packing slip attached to this form?
☑ Yes	☐ No		5. Were proper custody procedures (relinquished/received) followed?
☑ Yes	☐ No		6. Were sample IDs listed on the COC?
☑ Yes	☐ No		7. Were sample IDs listed on all sample containers?
☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☐ Yes	☐ No	☑ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H2SO4, HNO3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is ***no***) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

MEMO

Date: **July 22, 2019**

To: **File**

From: **Rob Huening, Ramboll**

cc: **Daniel J Price, Ramboll**

Subject: **Calumet Montana Refining**
Data Usability Assessment
Methods 8260C, 8270, 6020A, MT EPH/VPH
SDG UF21029, 2 Soil Samples, 1 Groundwater Sample, 1 Water Sample

Data validation and usability assessment was conducted for data package UF21029 based on the National Functional Guidelines for Superfund Organic Methods Data Review OSWER 9355.0-132, EPA-540-R-014-002 (USEPA August 2014) and National Functional Guidelines for Superfund Inorganic Methods Data Review (USEPA August 2014). The following samples were reported in this data package:

Sample ID	Lab Sample ID
CMR-WB06-10.0-10.5-190620	UF21029-001
CMR-WB06-6.0-6.5-190620	UF21029-002
TB-19-20190620	UF21029-003
CMR-WB06S-190620	UF21029-004

Data validation included a review of the following QC parameters:

- Data Package Completeness
- Preservation and Holding Times
- Instrument Performance Check
- Blanks
- Deuterated Monitoring Compound or Surrogate Spikes
- Matrix Spike/Matrix Spike Duplicate
- Field Duplicate Samples
- Laboratory Control Sample
- Internal Standards
- Tentatively Identified Compounds
- System Performance
- Overall Assessment of Data

QC criteria were met for each parameter with the following exceptions:

LCS/LCSD Recoveries
During analysis LCS/LCSD samples were run and recoveries were reported. These recoveries were largely in criteria with the exception of aqueous methyl acetate. The out of criteria recoveries indicate a possible bias. Low recoveries indicate a possible low bias and high recoveries indicate a possible high bias. In general, high bias does not affect non-detect results. Based on the potential bias all aqueous methyl acetate results have been validated as estimated.

Overall Assessment of Data
Overall, data are acceptable and usable for project objectives. The laboratory flags (*, F1) to denote out of criteria results were removed. Several results were flagged J by the laboratory because the concentrations calculated were below the method reporting limit and above the laboratory detection limit. The J flag was retained. These results should be considered estimated as the calculated concentrations are below the instrument calibration range.

No additional validation actions were taken on project samples. Results are usable for project purposes as validated.

Attachment 1: Data Validation Summary Checklist

Inorganic Data Review Summary

SDG No. UF21029

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 2 Soil, 1 GW, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	Metals (Modified Skinner List)
Preservation and Holding Times	No issues
Blanks	Zinc detected below the RL in aqueous method blank sample. Project sample detections well above blank value. No action taken.
Matrix Spike/Matrix Spike Duplicate	No issues
Laboratory Control Sample	No issues
Duplicate Samples	No issues
Other Non-conformances	No other non-conformances noted during analysis.
Overall Assessment of Data	No validation action warranted.

SDG No. UF21029

Site Calumet Montana Refining

Laboratory Shealy Environmental

Number of Samples/Matrix 2 Soil, 1 GW, 1 Water

Reviewer Name R Huening

Completion Date July 15, 2019

Review Criteria	VOC 8260C, SVOC 8270	VPH/EPH
Preservation and Holding Times	No issues	No issues
Blanks	No issues	No issues
Deuterated Monitoring Compound or Surrogate Spikes	No issues	No issues
Matrix Spike/Matrix Spike Duplicate	No MS/MSD results reported with samples. No action taken.	No MS/MSD results reported with samples. No action taken.
Laboratory Control Sample	LCS out high for acetone with no detections. No action taken. Aqueous LCS out of criteria low for methyl acetate. All aqueous methyl acetate results validated as estimated (J, UJ).	No issues
Internal Standards	No issues	No issues
Tentatively Identified Compounds	No TICs identified by the lab.	N/a
Other Non-conformances	No other non-conformances noted.	No other non-conformances noted
Overall Assessment of Data	All aqueous methyl acetate results validated as estimated (J, UJ).	No validation action warranted.

Case Narrative
Ramboll US Corporation
Lot Number: UF21029

This Report of Analysis contains the analytical result(s) for the sample(s) listed on the Sample Summary following this Case Narrative. The sample receiving date is documented in the header information associated with each sample.

All results listed in this report relate only to the samples that are contained within this report.

Sample receipt, sample analysis, and data review have been performed in accordance with the most current approved NELAC standards, the Shealy Environmental Services, Inc. ("Shealy") Quality Assurance Management Plan (QAMP), standard operating procedures (SOPs), and Shealy policies. Any exceptions to the NELAC standards, the QAMP, SOPs or policies are qualified on the results page or discussed below.

Where applicable, all soil sample analysis are reported on a dry weight basis unless flagged with a "W" qualifier

If you have any questions regarding this report please contact the Shealy Project Manager listed on the cover page.

Volatiles
The laboratory control sample (LCS) associated with batch 21545 had acetone recovered above the acceptance limits. This could potentially result in a high bias on analytical results. There were no detections for this compound in the samples associated with this batch; therefore, data quality is not impacted.

The LCS associated with batch 21545 had methyl acetate recovered marginally outside of the acceptance limits. Due to the large number of analytes in the LCS, there is a high statistical probability of a few analytes outside of control limits. Per SW-846 Update V 8000D- 23 Revision 4 July 2014, a number of analytes should be allowed to marginally fail the limits without requirement for corrective action. The laboratory's SOP allows for 10% of analytes to recover marginally outside criteria.

Semivolatiles
The method blank associated with batch 20650 had bis(2-ethylhexyl)phthalate detected at a concentration that was below the LOQ. All samples associated with this method blank that have detections for bis(2-ethylhexyl)phthalate have been flagged with a “B” qualifier.

Montana EPH
Sample -004 had the surrogate recovered outside of the acceptance limits due to confirmed matrix interference.

Montana VPH
The method blank associated with batch 21459 had benzene detected at a concentration that was below the LOQ. There were no detections for this compound in the samples associated with this method blank.

The closing continuing calibration verification (CCV) associated with sample -004 was recovered outside of the acceptance limits due to objective evidence of matrix interference.

Metals

The method blank associated with batch 20830 had zinc detected at a concentration that was below the LOQ. All samples associated with this method blank that have detections for zinc have been flagged with a “B” qualifier.

Isophorone	78-59-1	8270D	ND		0.80	0.22	ug/L	1

LOQ = Limit of Quantitation
ND = Not detected at or above the DL
H = Out of holding time
B = Detected in the method blank
N = Recovery is out of criteria
W = Reported on wet weight basis
E = Quantitation of compound exceeded the calibration range
P = The RPD between two GC columns exceeds 40%
DL = Detection Limit
J = Estimated result < LOQ and ≥ DL

☑ Yes	☐ No		8. Was collection date & time listed on the COC?
☑ Yes	☐ No		9. Was collection date & time listed on all sample containers?
☑ Yes	☐ No		10. Did all container label information (ID, date, time) agree with the COC?
☑ Yes	☐ No		11. Were tests to be performed listed on the COC?
☑ Yes	☐ No		12. Did all samples arrive in the proper containers for each test and/or in good condition (unbroken, lids on, etc.)?
☑ Yes	☐ No		13. Was adequate sample volume available?
☑ Yes	☐ No		14. Were all samples received within ½ the holding time or 48 hours, whichever comes first?
☐ Yes	☑ No		15. Were any samples containers missing/excess (circle one) samples Not listed on COC?
☐ Yes	☑ No	☐ NA	16. For VOA and RSK-175 samples, were bubbles present >"pea-size" (¼"or 6mm in diameter) in any of the VOA vials?
☑ Yes	☐ No	☐ NA	17. Were all DRO/metals/nutrient samples received at a pH of < 2?
☐ Yes	☐ No	☑ NA	18. Were all cyanide samples received at a pH > 12 and sulfide samples received at a pH > 9?
☐ Yes	☐ No	☑ NA	19. Were all applicable NH_3/TKN/cyanide/phenol/625 (< 0.5mg/L) samples free of residual chlorine?
☐ Yes	☐ No	☑ NA	20. Were client remarks/requests (i.e. requested dilutions, MS/MSD designations, etc…) correctly transcribed from the COC into the comment section in LIMS?
☐ Yes	☑ No		21. Was the quote number listed on the container label? If yes, Quote # NA

Sample Preservation (Must be completed for any sample(s) incorrectly preserved or with headspace.)

Sample(s) NA were received incorrectly preserved and were adjusted accordingly in sample receiving with NA mL of circle one: H_2SO_4, HNO_3, HCl, NaOH using SR # NA.
Time of preservation NA. If more than one preservative is needed, please note in the comments below.

Sample(s) NA were received with bubbles >6 mm in diameter.

Samples(s) NA were received with TRC > 0.5 mg/L (If #19 is ***no***) and were adjusted accordingly in sample receiving with sodium thiosulfate ($Na_2S_2O_3$) with Shealy ID: NA.

Subject: Physical Properties Analysis
Project: CMR RIAIM - EAST/WEST RAIL
CL File No: 1901843

Dear Mr.Wilson:

The attached file presents the final physical properties determination results for the samples submitted from your Project CMR RIAIM - EAST/WEST RAIL.

Appropriate ASTM, EPA or API methodologies were used for this project and SOP's are available on request. The samples for this project are currently in storage and will be retained for thirty days past completion of testing at no charge. At the end of thirty days, the samples will be disposed. You may contact me regarding continued storage, disoposal, or return of the samples.

Thank you for this opportunity to be of service to Ramboll US Corporation. Please do not hesitate to contact us at (661-325-5657) if you have any questions regarding these results or if we can be of any additional service.

Sincerely,
Core Laboratories

Eva Lopez
Core Analyst

Data Validation and Usability Review

Following the lab analysis of all samples Ramboll completed a separate QA/QC review of the reported laboratory data in accordance with the QAPP. This step (referred to generally as validation) consisted of an additional independent review of quality control information provided by the laboratory as well as quality control samples collected in the field by sampling staff. The review was equivalent to the Stage 2A validation as defined by USEPA (USEPA 2009). To ensure the validation process was consistent and rigorous a worksheet format was used to assess each sample delivery group report. Completed memos and worksheets are provided in Appendix E. Validation principles and guidance were be based on the USEPA National Functional Guidelines (USEPA 2017).

During the review Ramboll did not find any significant data quality issues that effected the overall usability of the lab data. All results were acceptably complete and largely met the data quality objectives as laid out in the QAPP. Minor issues existed in some SDGs but these issues were either isolated to non-constituents of concern or only affected a subset of sample results. These non-conformances are addressed individually in each SDG's validation worksheet and memo. Two common usability concerns seen in project data and their implications are listed below:

- Blank Detections: In multiple SDGs some analytes were detected in blank samples, either within the laboratory analytical process or from the field. These blank detections indicate possible cross-contamination concerns. In general these results were validated as non-detect as the source of the possible contamination could not be determined.
- Spike Recovery Non-Conformances: In multiple SDGs for multiple analytes some spike sample (matrix spikes, lab control spikes) recoveries were out of criteria. These out of criteria results indicate a possible accuracy bias. In order to account for this possible bias these results were validated as estimated.

Following the validation and usability review Ramboll summarized the results by applying validation qualifiers to the final result data. These qualifiers communicate the biases found during validation efforts. Qualifiers were uploaded to the project EQuIS database and will be presented with project results in all reporting and engineering tasks to ensure that ALL data users are aware of quality and usability limitations.

Summary of Validator Qualifiers
Calumet Monana Refinery, LLC - Great Falls, Montana

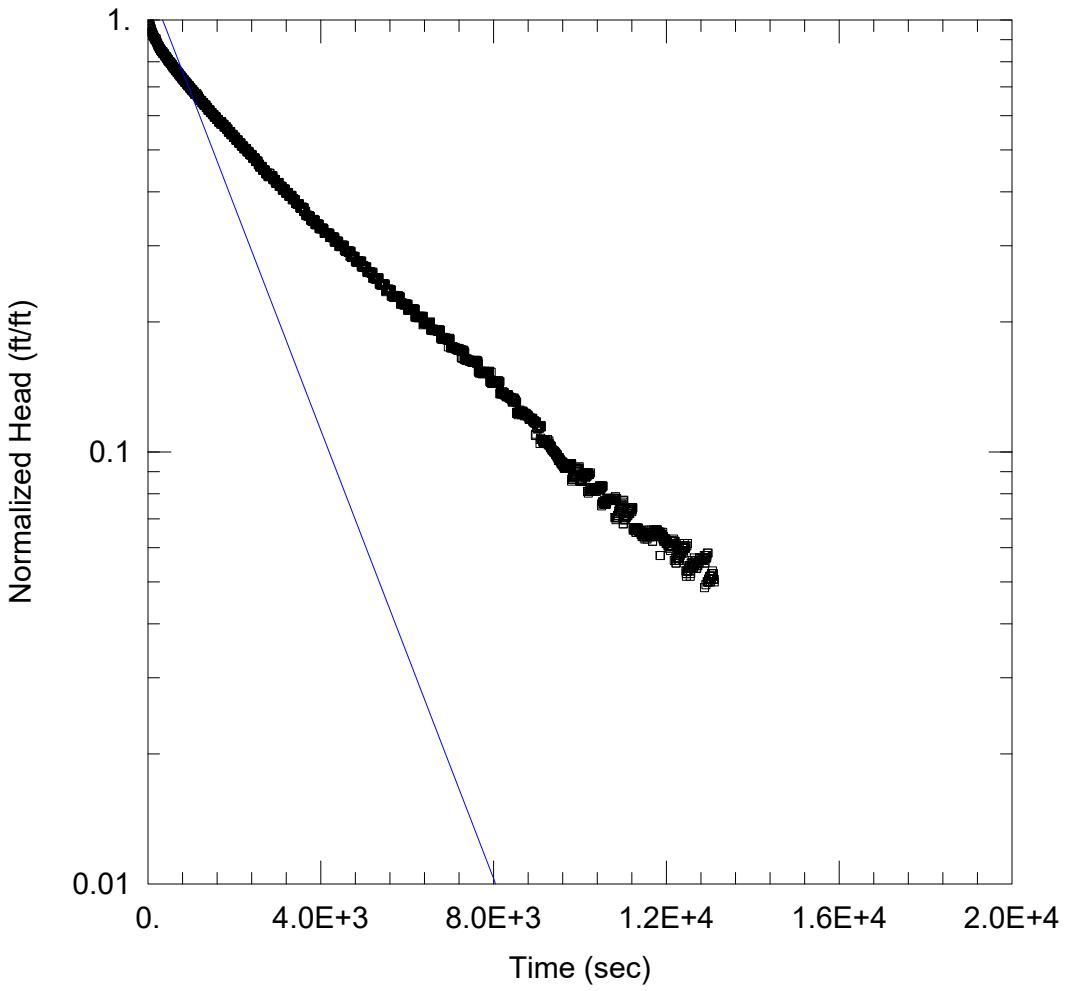
APPENDIX F
Groundwater Slug Test Data



MW-79S (EB-01) SLUG TEST

Data Set: K:\...\MW-79S_EB-01.aqt
Date: 07/18/19 Time: 15:23:52

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: MW-79S (EB-01)
Test Date: 6/27/2019

AQUIFER DATA

Saturated Thickness: 12.28 ft Anisotropy Ratio (Kz/Kr): 1.

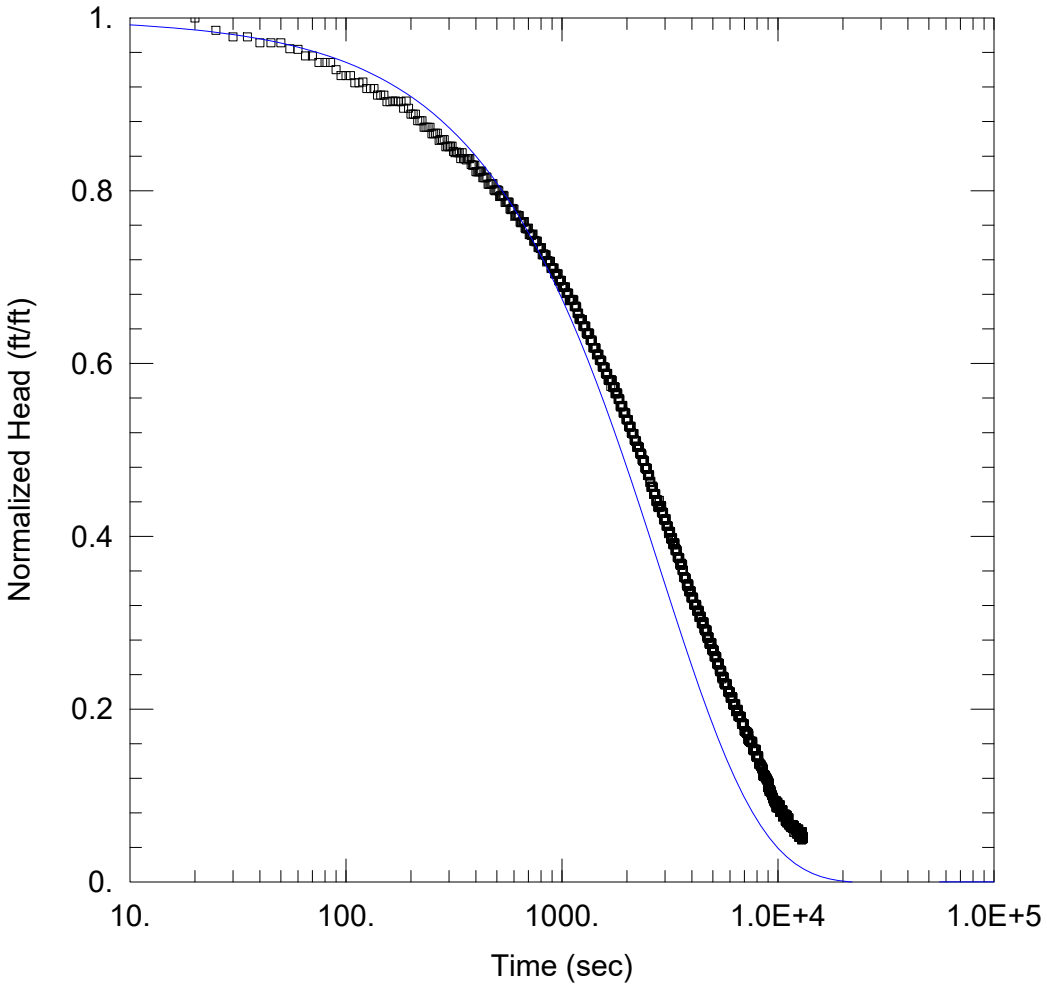
WELL DATA (MW-79S (EB-01))

Initial Displacement: 1.32 ft
Total Well Penetration Depth: 15. ft
Casing Radius: 0.083 ft
Static Water Column Height: 12.28 ft
Screen Length: 10. ft
Well Radius: 0.083 ft

SOLUTION

Aquifer Model: Unconfined Solution Method: Bouwer-Rice

K = 0.07036 ft/day y0 = 1.617 ft



MW-79S (EB-01) SLUG TEST

Data Set: K:\...\MW-79S_EB-01.aqt
Date: 07/18/19 Time: 15:22:31

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: MW-79S (EB-01)
Test Date: 6/27/2019

AQUIFER DATA

Saturated Thickness: 12.28 ft

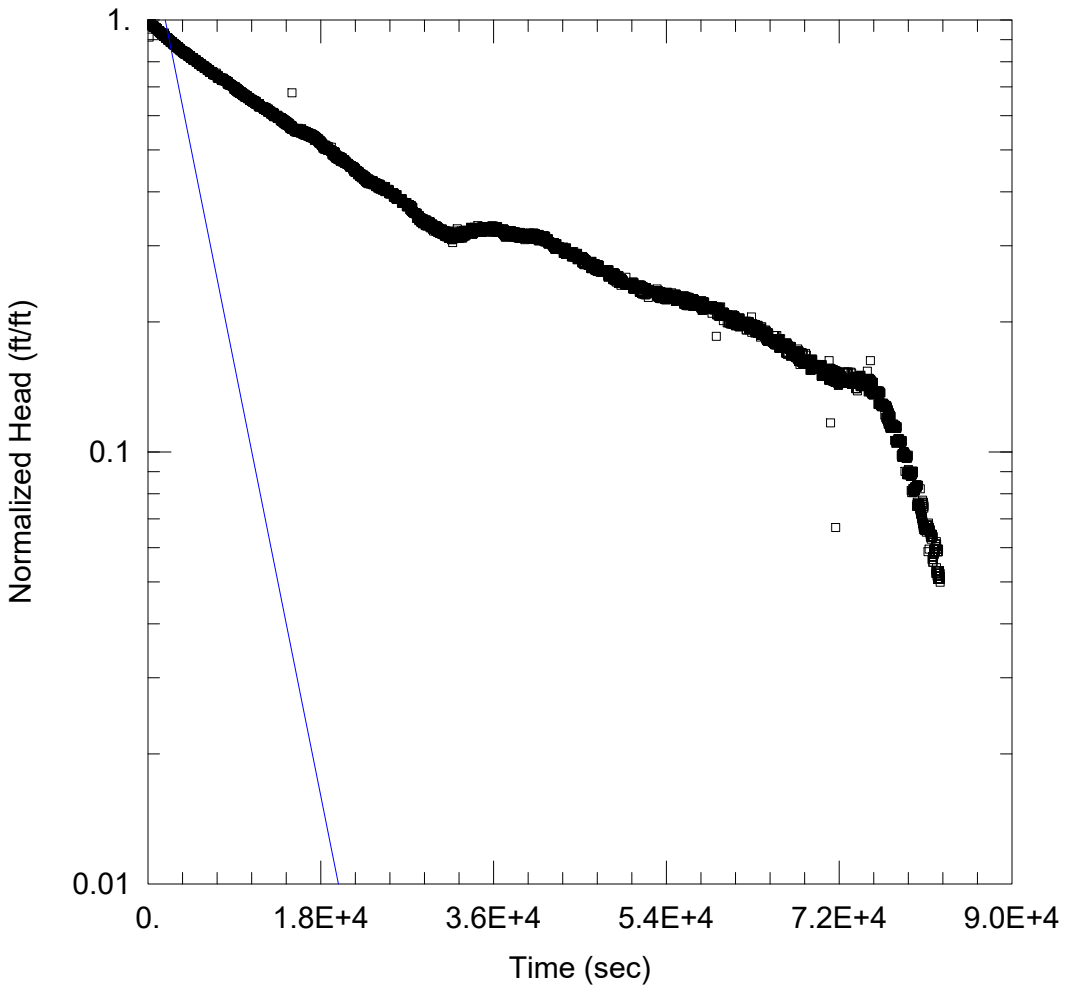
WELL DATA (MW-79S (EB-01))

Initial Displacement: 1.32 ft
Total Well Penetration Depth: 15. ft
Casing Radius: 0.083 ft
Static Water Column Height: 12.28 ft
Screen Length: 10. ft
Well Radius: 0.083 ft

SOLUTION

Aquifer Model: Unconfined
Solution Method: KGS Model

Kr = 0.07036 ft/day
Kz/Kr = 1.
Ss = 3.025E-5 ft^{-1}



MW-79D (EB-01) SLUG TEST

Data Set: K:\...\MW-79D_EB-01.aqt
Date: 07/18/19 Time: 16:55:55

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: MW-79D (EB-01)
Test Date: 6/27/2019

AQUIFER DATA

Saturated Thickness: 20.12 ft Anisotropy Ratio (Kz/Kr): 1.

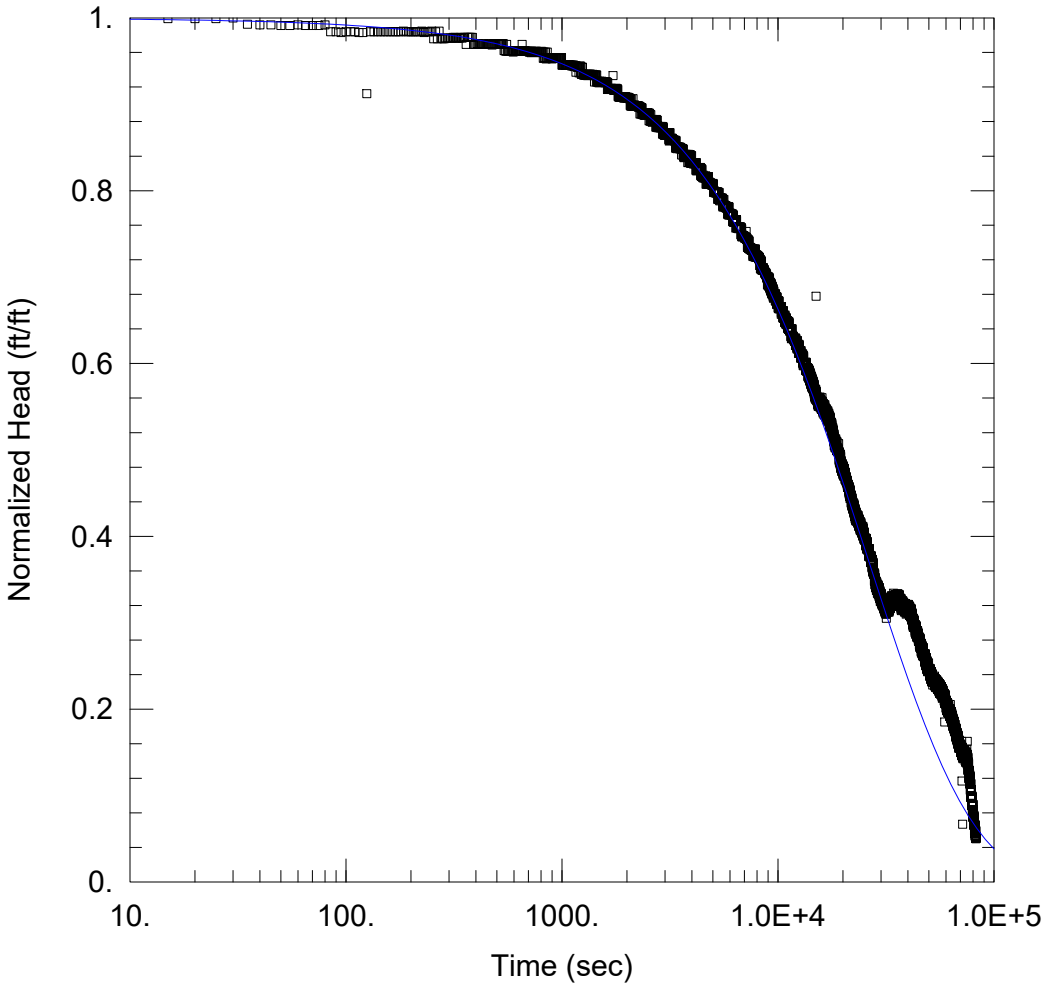
WELL DATA (MW-79D (EB-01))

Initial Displacement: 1.242 ft
Total Well Penetration Depth: 26. ft
Casing Radius: 0.083 ft
Static Water Column Height: 20.12 ft
Screen Length: 7.5 ft
Well Radius: 0.083 ft

SOLUTION

Aquifer Model: Unconfined Solution Method: Bouwer-Rice

K = 0.04294 ft/day y0 = 1.964 ft



MW-79D (EB-01) SLUG TEST

Data Set: K:\...\MW-79D_EB-01.aqt
Date: 07/18/19 Time: 16:54:20

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: MW-79D (EB-01)
Test Date: 6/27/2019

AQUIFER DATA

Saturated Thickness: 20.12 ft

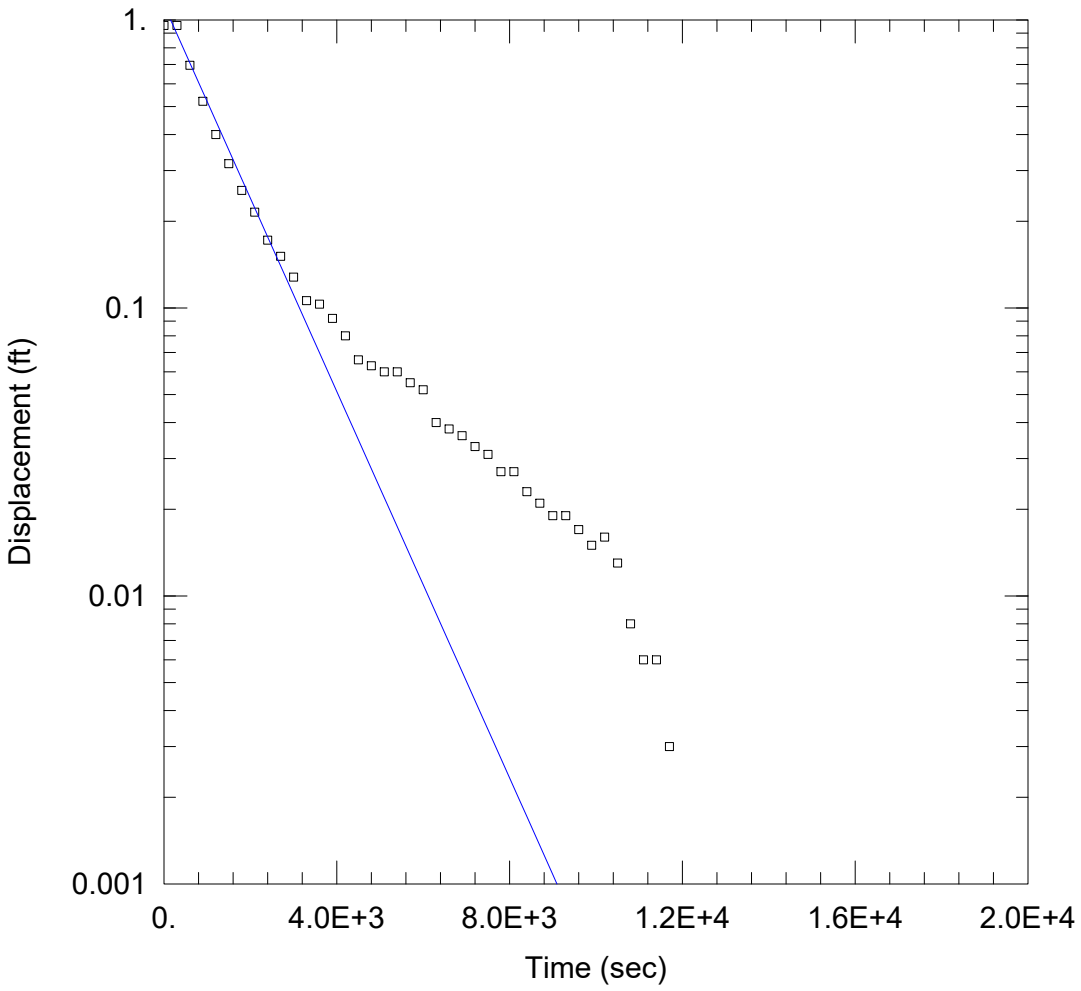
WELL DATA (MW-79D (EB-01))

Initial Displacement: 1.242 ft
Total Well Penetration Depth: 26. ft
Casing Radius: 0.083 ft
Static Water Column Height: 20.12 ft
Screen Length: 7.5 ft
Well Radius: 0.083 ft

SOLUTION

Aquifer Model: Unconfined
Solution Method: KGS Model

Kr = 0.008865 ft/day
Kz/Kr = 1.
Ss = 3.838E-5 ft^{-1}



MW-81S (EB-06) SLUG TEST

Data Set: K:\...\MW-81S_EB-06.aqt
Date: 07/18/19 Time: 15:27:19

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: MW-81S (EB-06)
Test Date: 6/13/2019

AQUIFER DATA

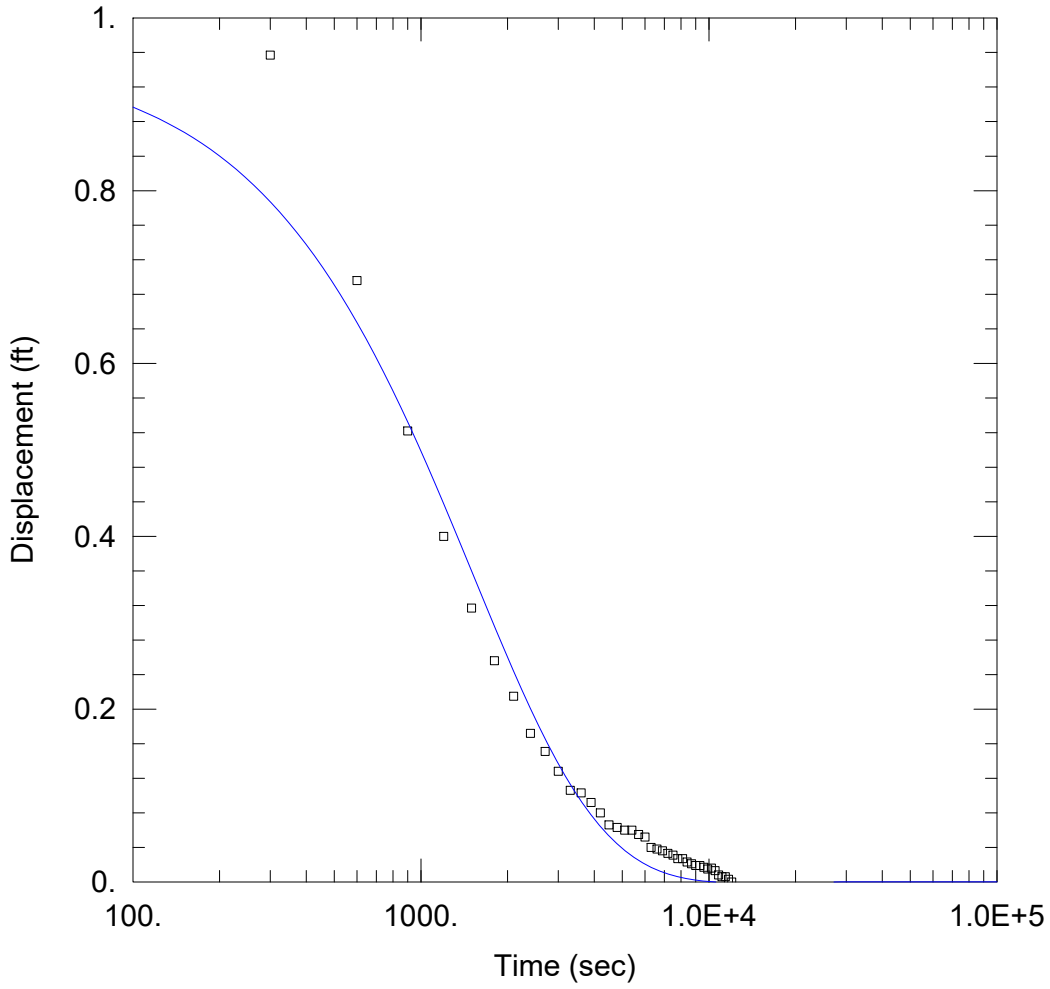
Saturated Thickness: 14.88 ft Anisotropy Ratio (Kz/Kr): 1.

WELL DATA (MW-81S (EB-06))

Initial Displacement: 0.957 ft
Total Well Penetration Depth: 17. ft
Casing Radius: 0.083 ft
Static Water Column Height: 14.88 ft
Screen Length: 12. ft
Well Radius: 0.083 ft

SOLUTION

Aquifer Model: Unconfined
Solution Method: Bouwer-Rice
K = 0.07802 ft/day
y0 = 1.126 ft



MW-81S (EB-06) SLUG TEST

Data Set: K:\...\MW-81S_EB-06.aqt
Date: 07/18/19 Time: 15:26:16

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: MW-81S (EB-06)
Test Date: 6/13/2019

AQUIFER DATA

Saturated Thickness: 14.88 ft

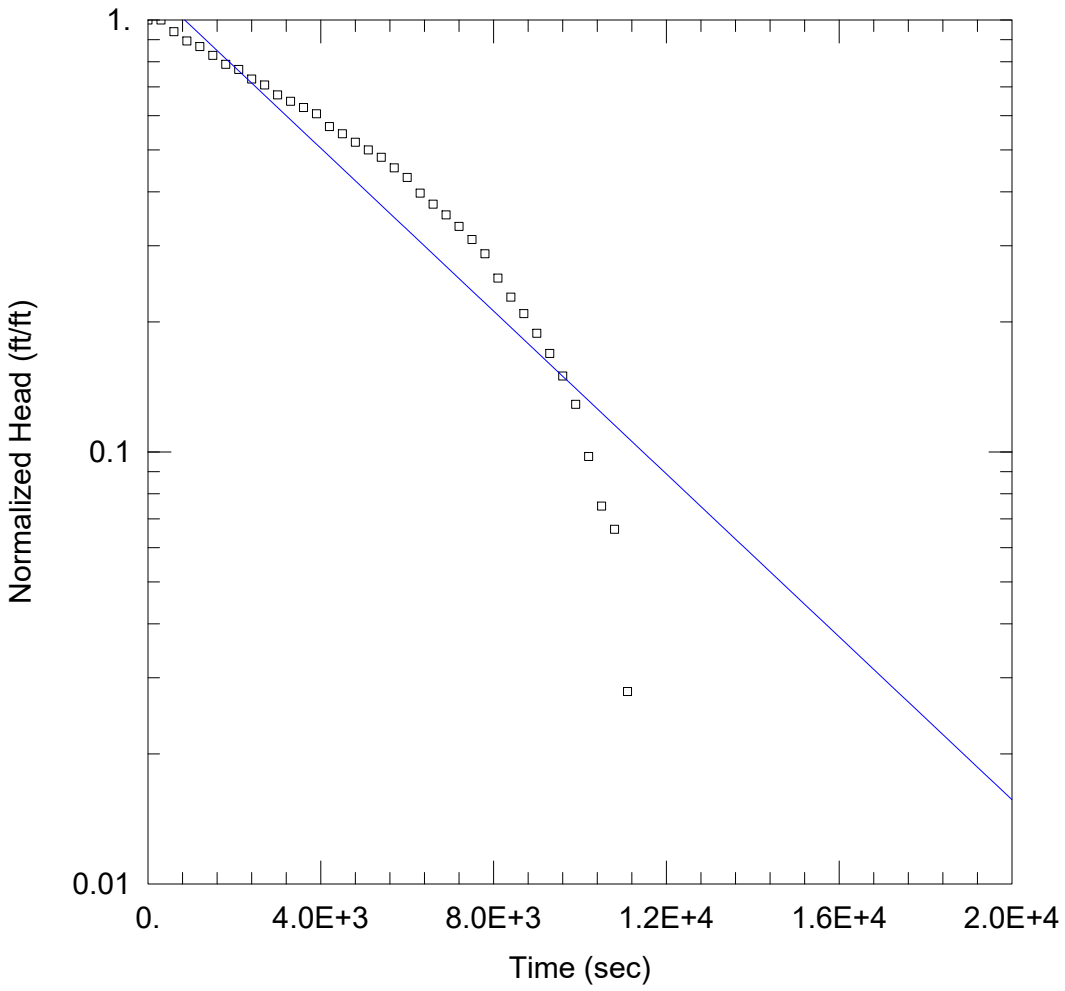
WELL DATA (MW-81S (EB-06))

Initial Displacement: 0.957 ft
Total Well Penetration Depth: 17. ft
Casing Radius: 0.083 ft
Static Water Column Height: 14.88 ft
Screen Length: 12. ft
Well Radius: 0.083 ft

SOLUTION

Aquifer Model: Unconfined
Solution Method: KGS Model

Kr = 0.1004 ft/day
Kz/Kr = 1.
Ss = 6.72E-12 ft^{-1}



MW-81D (EB-06) SLUG TEST

Data Set: K:\...\MW-81D_EB-06.aqt
Date: 07/18/19 Time: 15:30:16

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: MW-81D (EB-06)
Test Date: 6/13/2019

AQUIFER DATA

Saturated Thickness: 19.26 ft Anisotropy Ratio (Kz/Kr): 1.

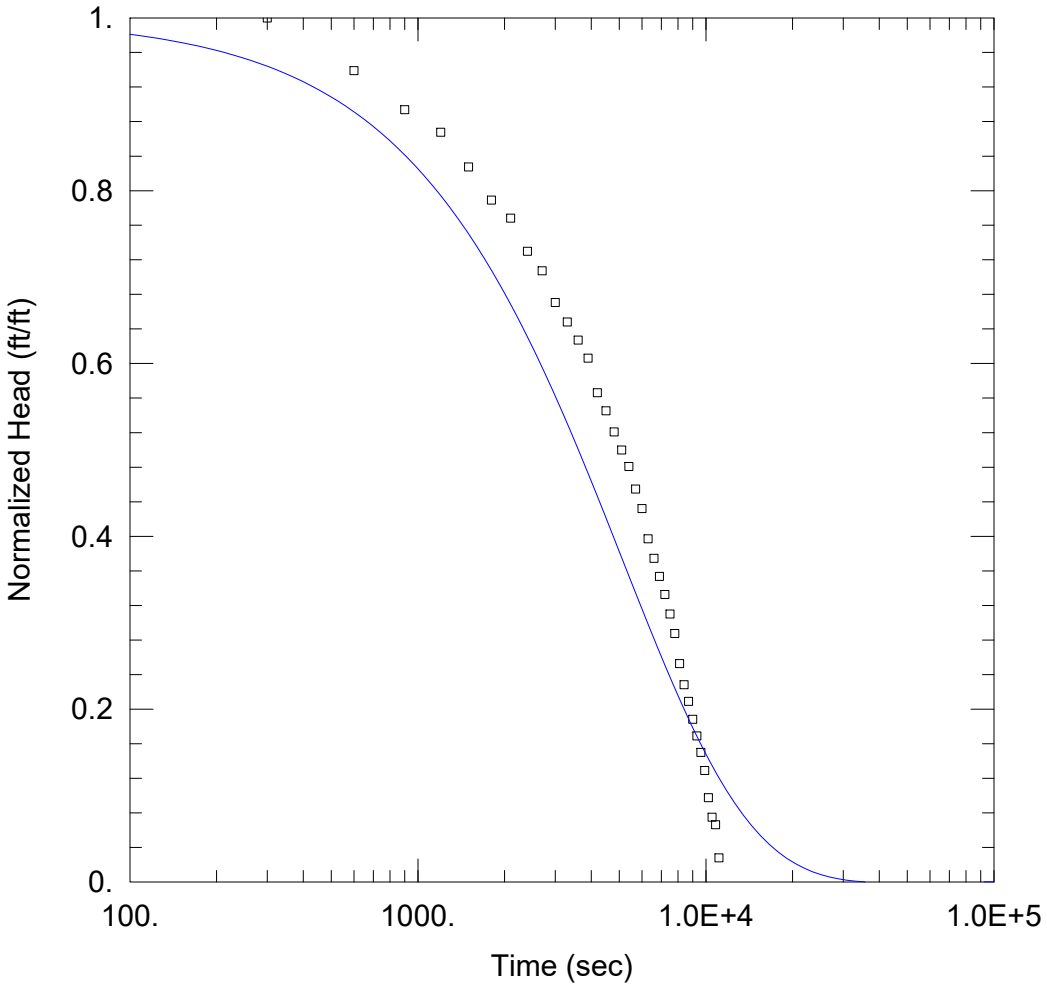
WELL DATA (MW-81D (EB-06))

Initial Displacement: 0.574 ft
Total Well Penetration Depth: 25. ft
Casing Radius: 0.083 ft
Static Water Column Height: 19.26 ft
Screen Length: 6. ft
Well Radius: 0.083 ft

SOLUTION

Aquifer Model: Unconfined Solution Method: Bouwer-Rice

K = 0.04486 ft/day y0 = 0.6901 ft



MW-81D (EB-06) SLUG TEST

Data Set: K:\...\MW-81D_EB-06.aqt
Date: 07/18/19 Time: 15:28:48

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: MW-81D (EB-06)
Test Date: 6/13/2019

AQUIFER DATA

Saturated Thickness: 19.26 ft

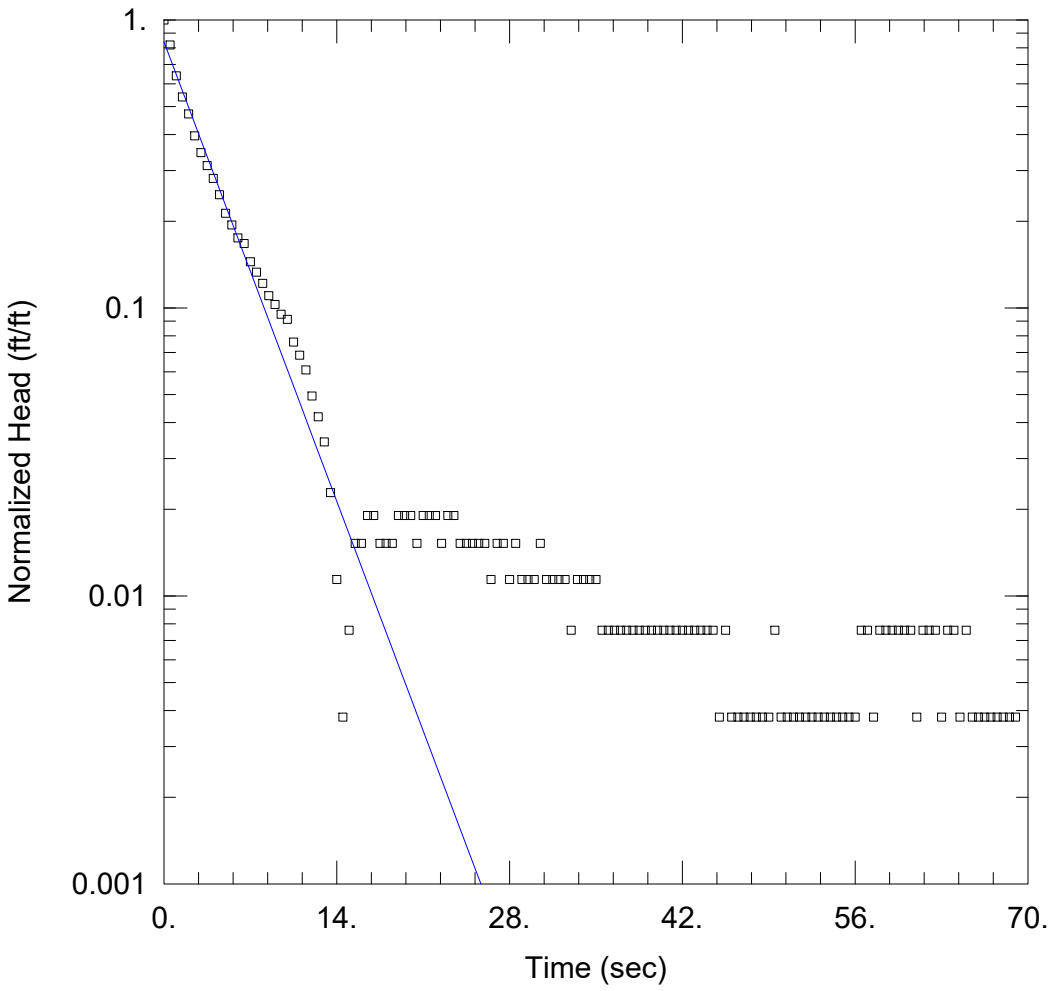
WELL DATA (MW-81D (EB-06))

Initial Displacement: 0.574 ft
Total Well Penetration Depth: 25. ft
Casing Radius: 0.083 ft
Static Water Column Height: 19.26 ft
Screen Length: 6. ft
Well Radius: 0.083 ft

SOLUTION

Aquifer Model: Unconfined
Solution Method: KGS Model

Kr = 0.04486 ft/day
Kz/Kr = 1.
Ss = 5.192E-12 ft^{-1}



EB-07-DPT SLUG TEST

Data Set: K:\...\EB-07-DPT.aqt
Date: 07/18/19 Time: 15:33:27

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: EB-07-DPT
Test Date: 6/14/2019

AQUIFER DATA

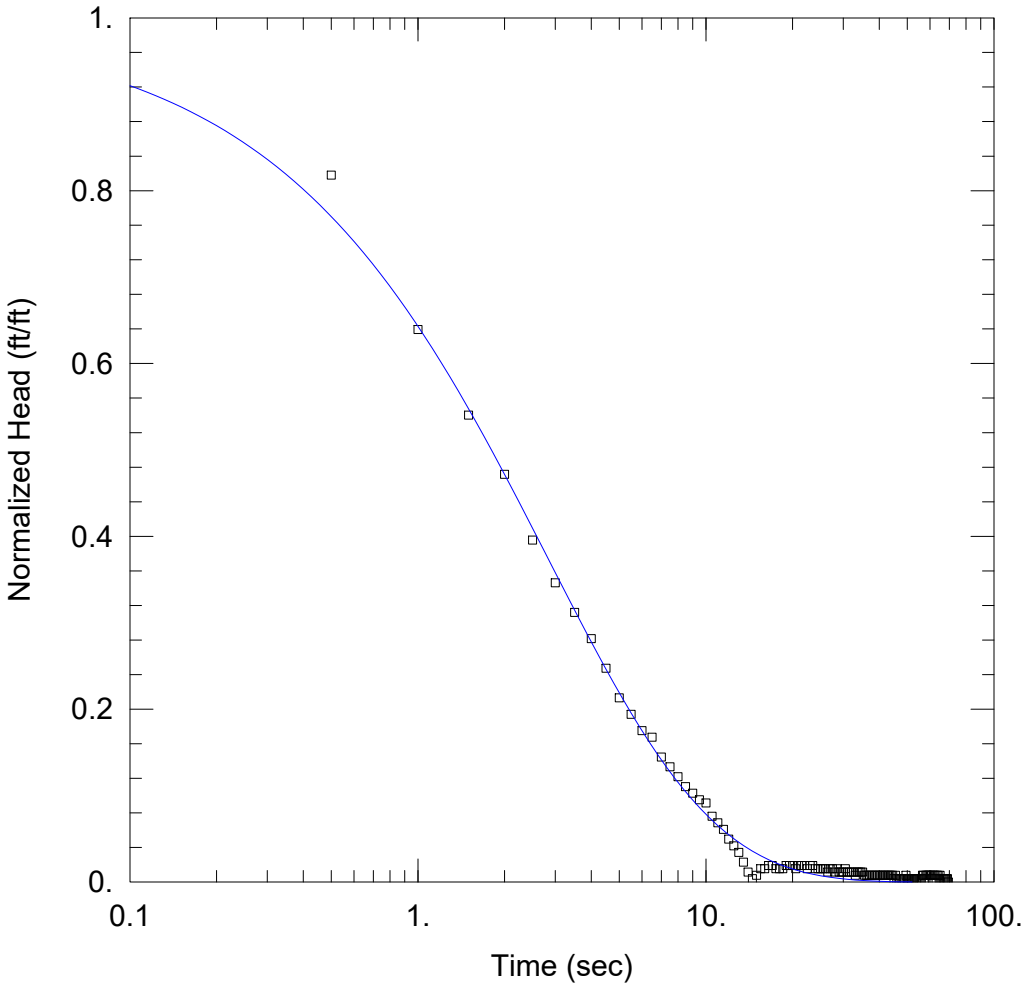
Saturated Thickness: 5.4 ft Anisotropy Ratio (Kz/Kr): 1.

WELL DATA (EB-07-DPT)

Initial Displacement: 0.838 ft Static Water Column Height: 5.4 ft
Total Well Penetration Depth: 14. ft Screen Length: 10. ft
Casing Radius: 0.083 ft Well Radius: 0.146 ft

SOLUTION

Aquifer Model: Unconfined Solution Method: Bouwer-Rice
K = 48.08 ft/day y0 = 0.7029 ft



EB-07-DPT SLUG TEST

Data Set: K:\...\EB-07-DPT.aqt
Date: 07/18/19 Time: 15:44:10

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: EB-07-DPT
Test Date: 6/14/2019

AQUIFER DATA

Saturated Thickness: 5.4 ft

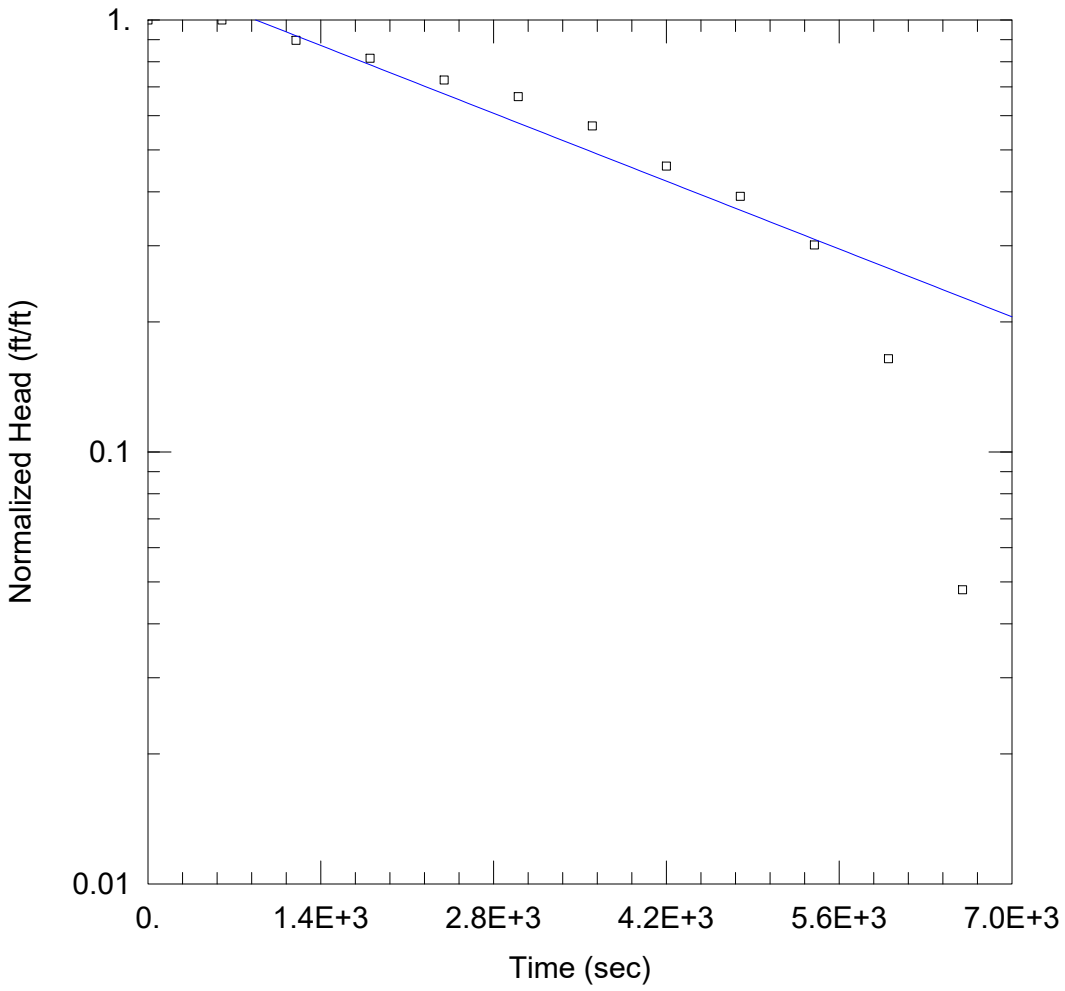
WELL DATA (EB-07-DPT)

Initial Displacement: 0.838 ft
Total Well Penetration Depth: 14. ft
Casing Radius: 0.083 ft
Static Water Column Height: 5.4 ft
Screen Length: 10. ft
Well Radius: 0.146 ft

SOLUTION

Aquifer Model: Unconfined
Solution Method: KGS Model

Kr = 76.19 ft/day
Kz/Kr = 1.
Ss = 0.0007943 ft^{-1}



EB-07D SLUG TEST

Data Set: K:\...\EB-07D.aqt
Date: 07/18/19 Time: 15:35:41

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: EB-07D
Test Date: 6/14/2019

AQUIFER DATA

Saturated Thickness: 12.45 ft Anisotropy Ratio (Kz/Kr): 1.

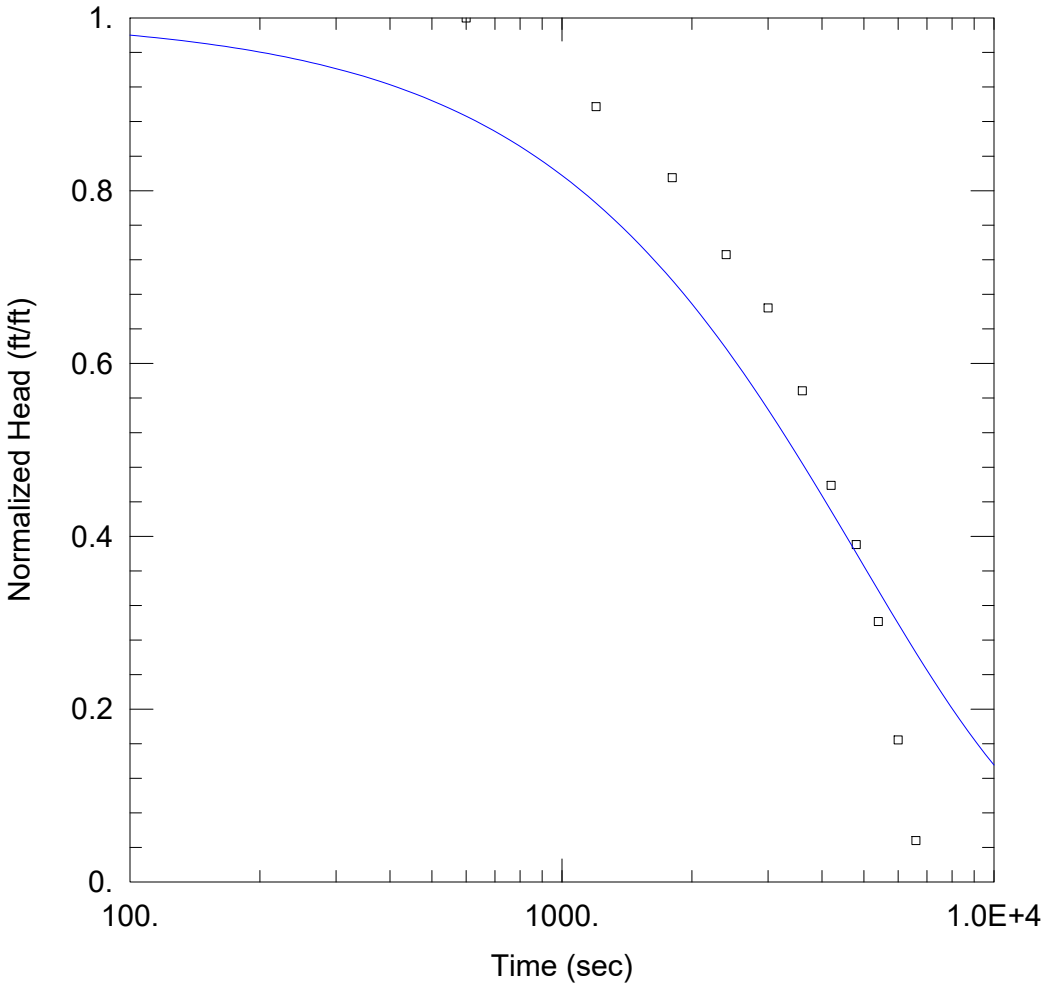
WELL DATA (EB-07D)

Initial Displacement: 0.146 ft
Total Well Penetration Depth: 29. ft
Casing Radius: 0.083 ft
Static Water Column Height: 12.45 ft
Screen Length: 10. ft
Well Radius: 0.292 ft

SOLUTION

Aquifer Model: Unconfined
Solution Method: Bouwer-Rice

K = 0.02556 ft/day
y0 = 0.1829 ft



EB-07D SLUG TEST

Data Set: K:\...\EB-07D.aqt
Date: 07/18/19 Time: 15:42:52

PROJECT INFORMATION

Company: Ramboll
Client: CMR
Project: 1690012344-003
Location: Great Falls, MT
Test Well: EB-07D
Test Date: 6/14/2019

AQUIFER DATA

Saturated Thickness: 12.45 ft

WELL DATA (EB-07D)

Initial Displacement: 0.146 ft
Total Well Penetration Depth: 29. ft
Casing Radius: 0.083 ft
Static Water Column Height: 12.45 ft
Screen Length: 10. ft
Well Radius: 0.292 ft

SOLUTION

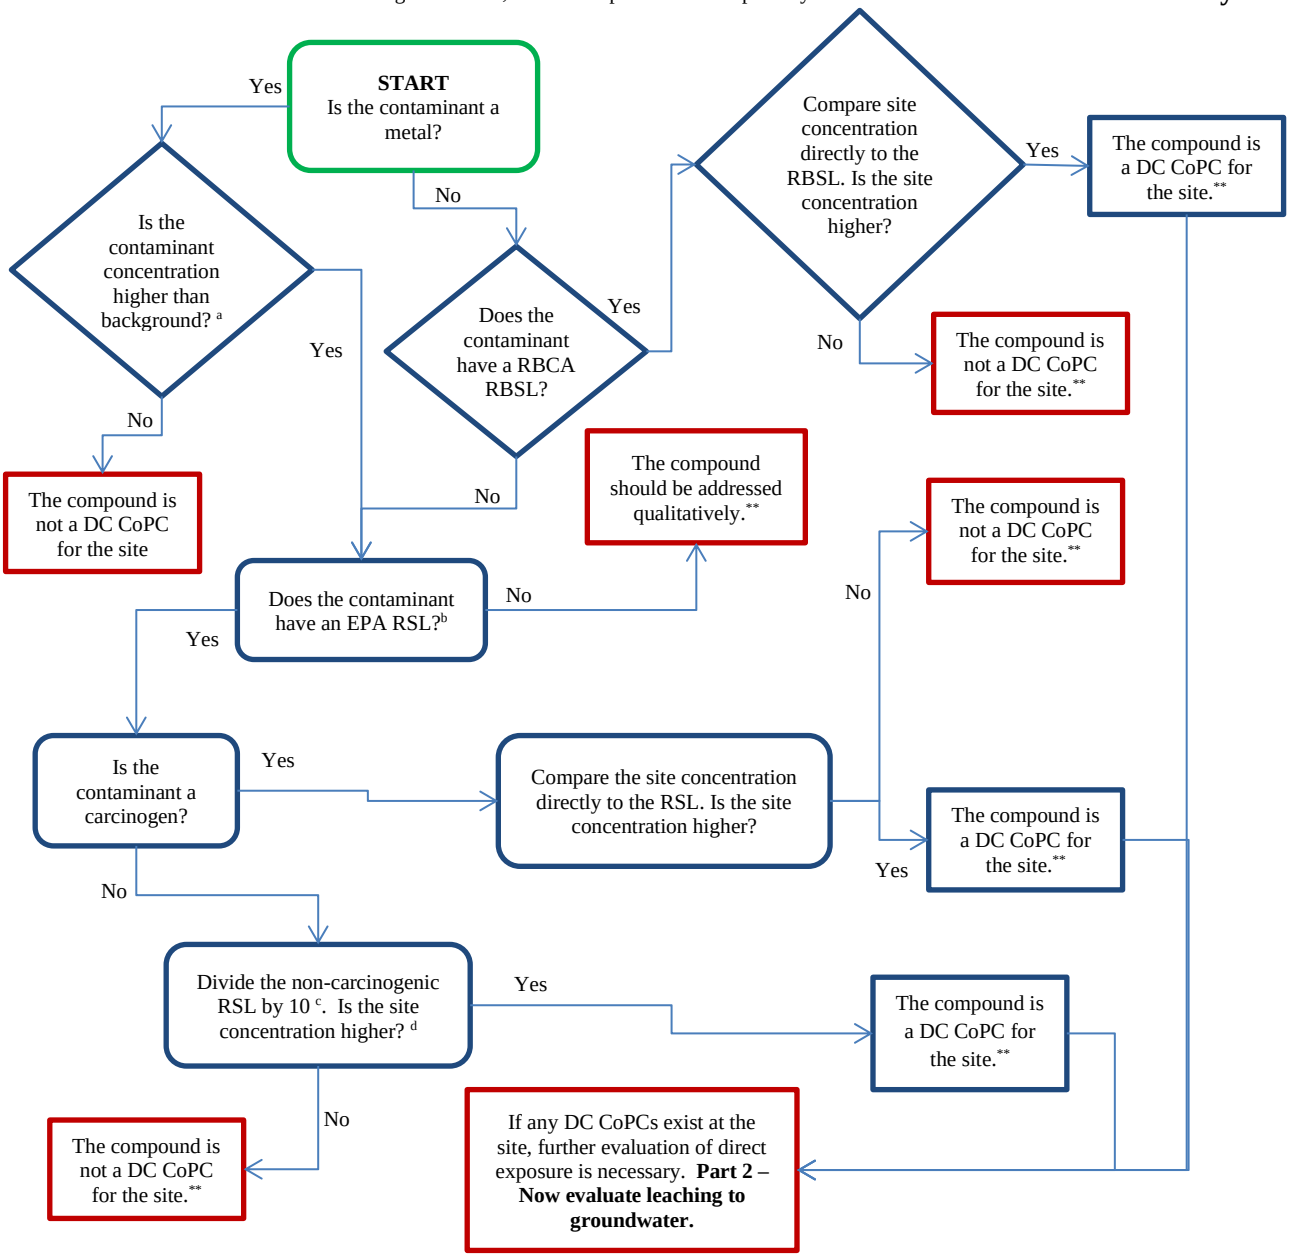
APPENDIX G

MDEQ's Soil Screening Flowchart

Surface and Subsurface Soil Screening Flowchart
Part 1 – Direct Exposure

Note: For volatile contaminants in soil or groundwater, evaluate vapor intrusion separately.

Revised July 2021



**Now Evaluate Leaching to Groundwater (Part 2) for complete screening

a = 2013 MT DEQ Inorganic Background Study Background Threshold Values (BTVs) Table 4-4 applies to both surface and subsurface soil

b = Use residential EPA RSLs for screening of both surface and subsurface soils (where RBSLs do not exist) to ensure adequate protection of construction workers (commercial/industrial numbers are not adequately protective in many cases due to soil ingestion assumptions).

c = Assumes use of the HQ=1 version of the RSL Summary table and should be performed for all non-carcinogenic compounds except for lead (see footnote d). Pay attention to the "**" footnote in the RSL table, as it requires you to also look at the HQ=0.1 table; use the RSL that is the lesser value of the two tables. If using the HQ=0.1 RSL table for initial screening, do not divide non-carcinogenic compounds by 10.

d = For lead do not use the RSL: DEQ uses a 5 µg/dL blood lead level endpoint for the IEUBK model. For residential soil use 200 mg/kg, and for commercial/industrial and construction scenarios use 696 mg/kg.

CoPC = contaminant of potential concern
DC = Direct contact (i.e., ingestion, inhalation, and dermal exposure)
EPA = Environmental Protection Agency
RBCA = Montana Risk-Based Corrective Action Guidance for Petroleum Releases
RBSL = Most current risk-based screening level from Table 4 (Master Table)
RSL = Most current EPA regional screening level for residential soil

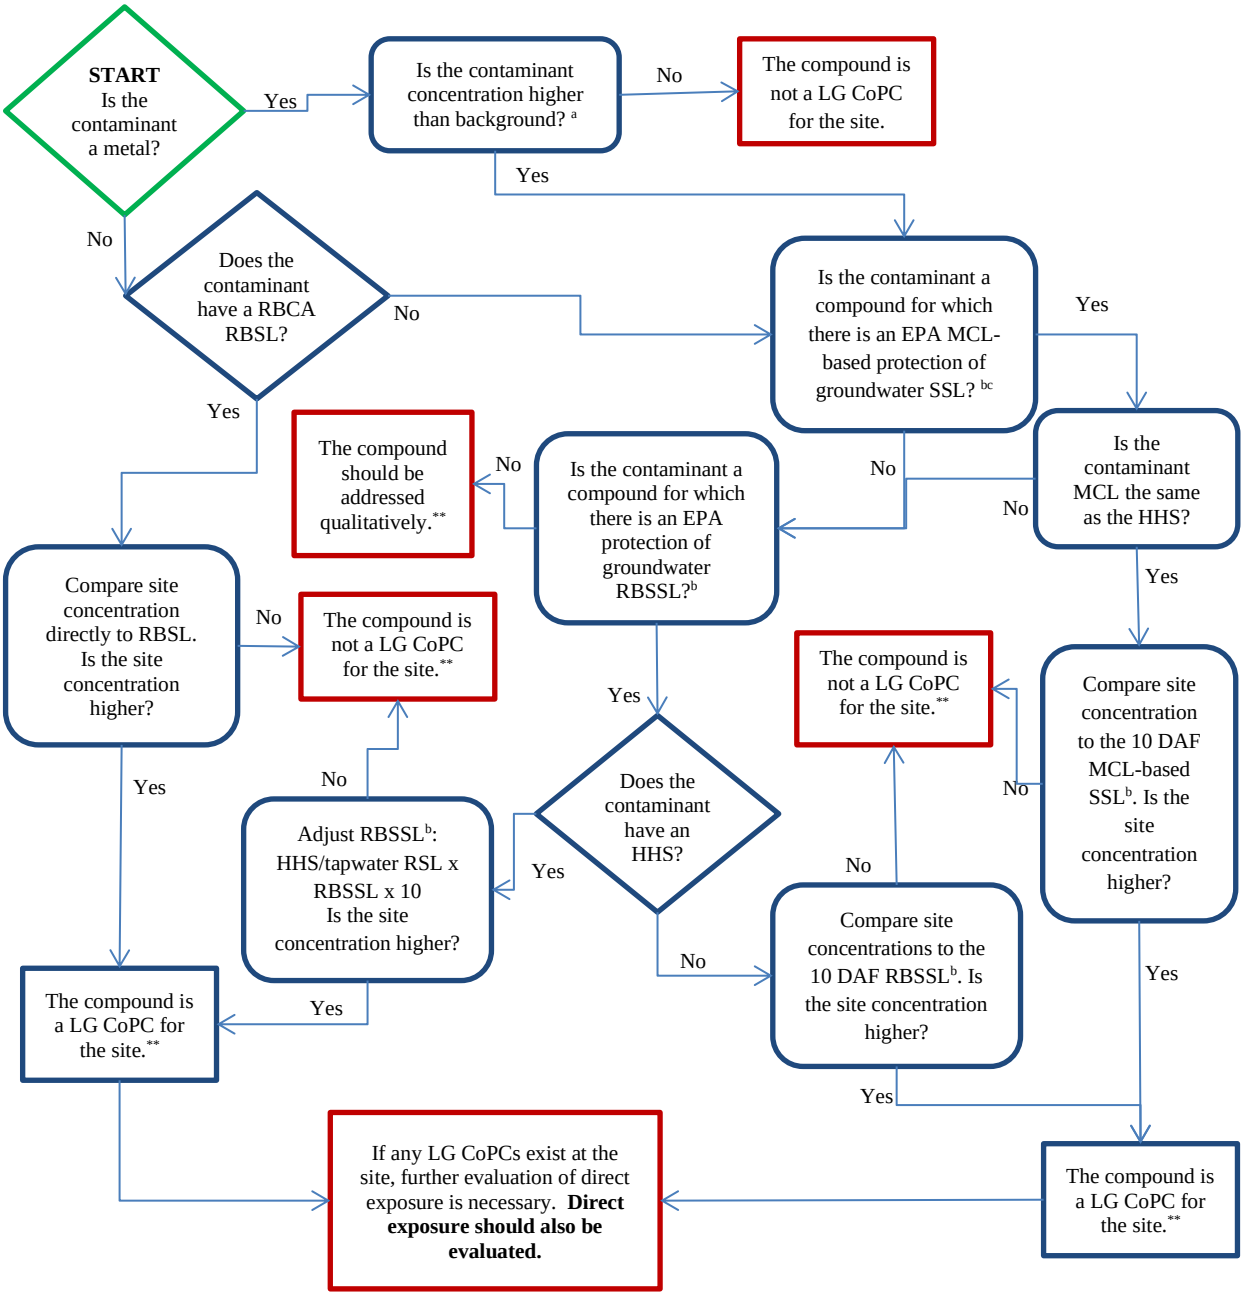
Surface and Subsurface Soil Screening Flowchart
Part 2 – Leaching to Groundwater



Note: For volatile contaminants in soil or groundwater, evaluate vapor intrusion separately.

Revised July 2021

****Direct exposure (Part 1) should also be evaluated for complete screening**

a = 2013 MT DEQ Inorganic Background Study Background Threshold Values (BTVs) Table 4-4 applies to both surface and subsurface soil

b = Assumes use of the HQ=1 version of the RSL Summary table; use of HQ=0.1 RSL table will result in incorrect leaching values for non-carcinogenic compounds.

c = For PCBs the total concentration of PCBs for each sample is compared to the most current 10 DAF MCL-based SSL.

CoPC = contaminant of potential concern
DAF = dilution attenuation factor
EPA = Environmental Protection Agency
HHS = Most current DEQ-7 human health standard for groundwater
LG = leaching to groundwater
MCL – EPA maximum contaminant level
RBCA = Montana Risk-Based Corrective Action Guidance for Petroleum Releases
RBSL = Most current risk-based screening level from the Table 4 (Master Table)
RBSSL = Most current EPA risk-based soil screening level (HQ=1 RSL table)
RSL = Most current EPA regional screening level (HQ=1 RSL table)
SSL = Most current EPA soil screening level (HQ=1 RSL table)

APPENDIX H
LNAPL Baildown Test Data

Generalized Bouwer and Rice (1976)

Well Designation: MW-101 (EB-03S)
Date: 3-Jul-19

$$T_n = \frac{r_e^{\,2}\ln(R/r_e)\ln(s_n(t_1)/s_n(t))}{2(-J)(t-t_1)}$$

Enter early time cut-off for least-squares model fit

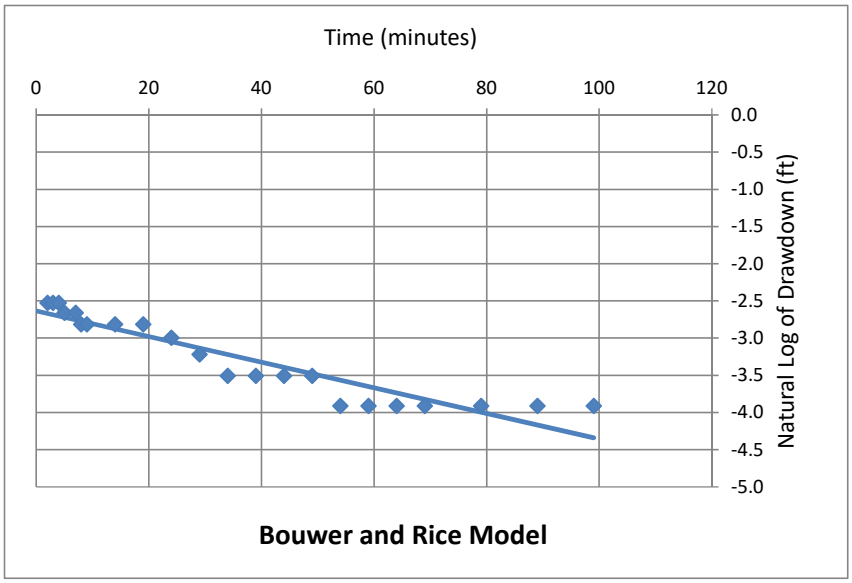
$Time_{cut}$	0	<- Enter or change value here

Model Results: T_n (ft^2/d) = 1.93 +/- 0.16 ft^2/d

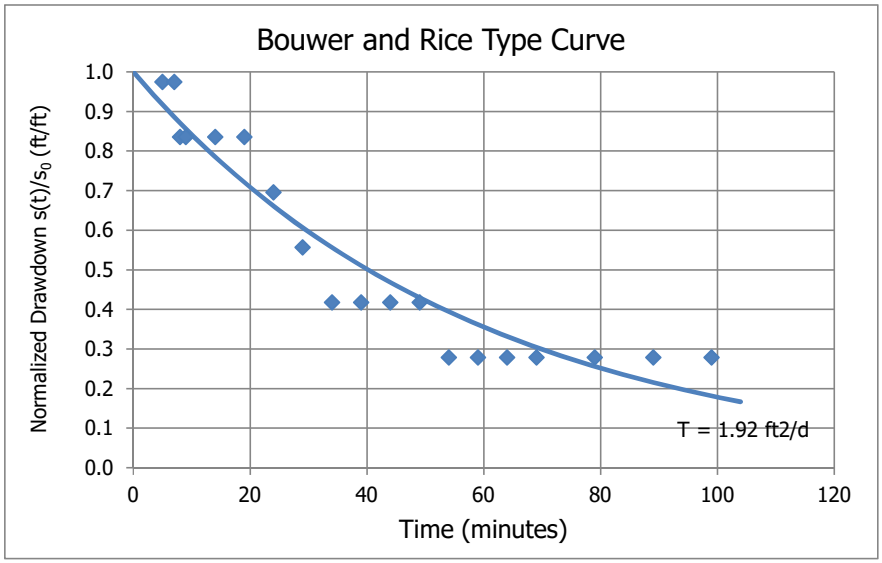
L_e/r_e
5.0
C
0.99
R/r_e
3.12

J-Ratio
-0.151

Coef. Of Variation
0.08



C coefficient calculated from Eq. 6.5(c) of Butler, The Design, Performance, and Analysis of Slug Tests, CRC Press, 2000.



Cooper and Jacob (1946)

Well Designation: MW-101 (EB-03S)
Date: 3-Jul-19

$$V_n(t_i) = \sum_j^i \frac{4\pi T_n s_j}{\ln\left(\frac{2.25 T_n t_j}{r_e^2 S_n}\right)} \Delta t_j$$

Enter early time cut-off for least-squares model fit

$Time_{cut}$ (min):	20	<- Enter or change values here
Time Adjustment (min):	12	

Trial S_n: d <-- Enter d for default or enter S_n value

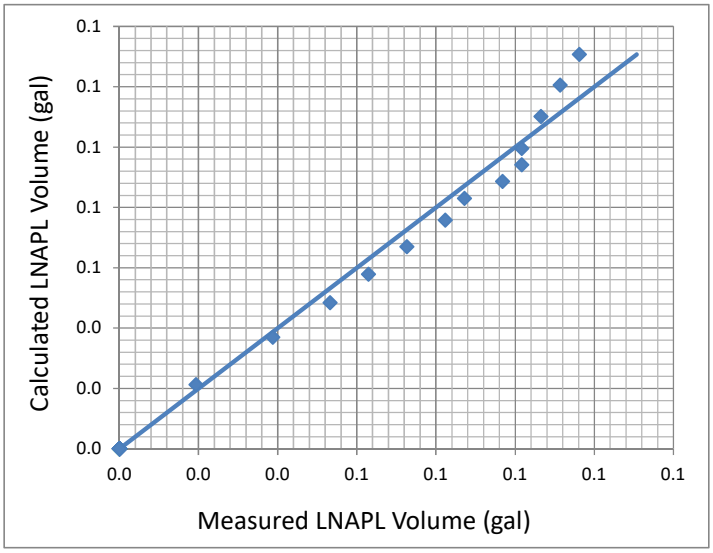
Root-Mean-Square Error: 0.024 <-- Minimize this using "Solver"

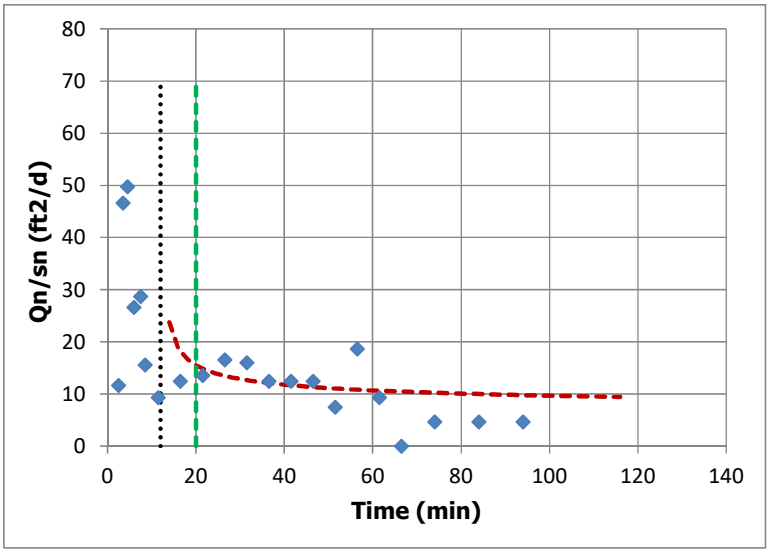
0.055 <-- Working S_n

Trial T_n (ft^2/d): 4.908 <-- By changing T_n through "Solver"

Add constraint T_n > 0.00001

Model Result: T_n (ft^2/d) = **4.91**





Height
70

Table 1
Product Drawdown and Recovery Test (MW-101)
Calumet Montana Refining, LLC - Great Falls, Montana

Date	Time	DTLNAPL (ft bTOC)	DTW (ft bTOC)	LNAPL Thickness (ft)	Comments
3-Jul	10:23	3.43	4.15	0.72	Before test.
3-Jul	10:30	3.43	4.15	0.72	Start pump. Lower pump intake to 5.5 feet (clear water with some black debris).
3-Jul	10:34	3.43	4.15	0.72	Stop pump.
3-Jul	10:43	3.43	4.15	0.72	Start pump. Raise intake to top of product to begin drawdown test.
3-Jul	10:47	3.46	3.96	0.50	Black to dark brown product. Purge rate approx 100 ml/min.
3-Jul	10:48	3.47	3.96	0.49	
3-Jul	10:49	3.47	4.00	0.53	
3-Jul	10:51	3.48	4.02	0.54	
3-Jul	10:54	3.50	3.95	0.45	Increased flow rate to 150-200 ml/min.
3-Jul	10:56	---	---	---	Lowered intake. No product or water coming out of tubing.
3-Jul	10:58	3.51	4.01	0.50	
3-Jul	11:02	---	---	---	Increased flow rate to 400-500 ml/min.
3-Jul	11:03	3.51	4.02	0.51	
3-Jul	11:04	3.54	3.90	0.36	
3-Jul	11:05	3.55	3.81	0.26	
3-Jul	11:07	3.56	3.66	0.10	
3-Jul	11:08	3.58	3.66	0.08	Purge mixture of product and water. Adjusted intake depth.
3-Jul	11:09	3.65	3.71	0.06	Purge mixture of product and water. Adjusted intake depth.
3-Jul	11:10	3.58	3.65	0.07	Purge mixture of product and water. Adjusted intake depth.
3-Jul	11:11	3.60	3.63	0.03	Stop pump. Recovery begins.
3-Jul	11:13	3.51	3.68	0.17	
3-Jul	11:14	3.51	3.69	0.18	
3-Jul	11:15	3.51	3.73	0.22	
3-Jul	11:16	3.50	3.76	0.26	
3-Jul	11:18	3.50	3.80	0.30	
3-Jul	11:19	3.49	3.81	0.32	
3-Jul	11:20	3.49	3.82	0.33	
3-Jul	11:25	3.49	3.85	0.36	
3-Jul	11:30	3.49	3.89	0.40	
3-Jul	11:35	3.48	3.92	0.44	
3-Jul	11:40	3.47	3.95	0.48	
3-Jul	11:45	3.46	3.97	0.51	
3-Jul	11:50	3.46	3.99	0.53	
3-Jul	11:55	3.46	4.01	0.55	
3-Jul	12:00	3.46	4.03	0.57	
3-Jul	12:05	3.45	4.03	0.58	
3-Jul	12:10	3.45	4.05	0.60	
3-Jul	12:15	3.45	4.06	0.61	
3-Jul	12:20	3.45	4.06	0.61	
3-Jul	12:30	3.45	4.07	0.62	
3-Jul	12:40	3.45	4.08	0.63	
3-Jul	12:50	3.45	4.09	0.64	
3-Jul	12:25	3.45	4.10	0.65	
3-Jul	15:25	3.43	4.11	0.68	
3-Jul	16:15	3.43	4.11	0.68
